Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

Canada's automotive "Dr. Phil" says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices downward, and a more competitive Japanese auto industry that's still reeling from a series of natural disasters.

Krishna, an immigrant from India and an engineer by profession, is diagnosed with bipolar disorder in his late twenties after a failed relationship with Courtney, an American woman who has beautiful blue eyes. Twenty years later, when Krishna is in his forties and the father of two children, strange gunmen begin following him in fast-moving cars, with the intent to kill. In trying to investigate his stalkers and why they want to kill him, Krishna realizes that his preference for women with blue eyes has made him a target of a white supremacist group. He also finds out that Neeloc, a waitress and engineering student he had a relationship with, one that ended disastrously, also seems to be associated with the supremacist group. Will Krishna's bipolar disorder make his situation worse, or will it help him this time? Will it just save his life so that he can be there for his children, or will it do more by helping him reunite with Neeloc, the woman he still cares about?

Mathematics for Elementary School Teachers is designed to give you a profound understanding of the mathematical content that you are expected to know and be able to teach. The chapters integrate the National Council of Teachers of Mathematics (NCTM) Standards and Expectations and the new Common Core State Standards, as well as research literature. The five NCTM Process Standards of problem solving, reasoning and proof, communication, connections, and representation highlight ways that teachers present content, the ways that students learn content, and various ways that students can demonstrate procedural and conceptual understanding. The worked examples and homework questions provide prospective elementary school teachers with opportunities to develop mathematical knowledge, understanding, and skills that they can apply in their own classrooms effectively. The learning path begins with the Where Are We Going? Chapter Openers, worked Examples with Yellow Markers that indicate the Process Standards throughout the text, to the Concept Maps, to the Section Question Sets with their refreshers of Process Standards, to the Chapter Organizers with Learning Outcomes and a list of the corresponding Review Questions, and finally, conclude at the Chapter Tests with their overarching Learning Outcomes. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

We're back! And this time we've got your back when it comes to you and your car. In Dare to Repair: A Do-It-Herself Guide to Fixing (Almost) Anything in the Home, we opened the door for you into the world of basic home repairs. Now, we're opening a different one -- a car door.
