In dental radiography, it is unusual for an
x-ray beam to be pointed at the abdomen
(only for vertex occlusal radiographs,
which are rarely indicated) and, in those
cases where radiography is essential,
abdominal lead protection should be used
when a foetus lies in the primary beam. 22
For all other dental radiographic views,

File Type PDF A Guide To Dental Radiography

including panoramic and CBCT examinations, there is no requirement to delay radiography until after the birth.
