Activism is
action on behalf
of a cause,
action that goes
beyond what is
conventional or
routine and is
relative to the
actions by
others. Health
activism is a
growing area of

interest for
many who work to
improve health
at both national
and
international
levels because
it offers a more
direct approach
to achieve
lasting social
and political
change. This
book, for the

to improve the health of groups and communities, this will be thought-provoking reading. It has particular relevance for postgraduate students and practitioners in public health and health promotion.
