NPTEL :: Civil Engineering - Advanced Geotechnical Engineering

Geotechnical Engineering is at the foundation of every structure and project. What do we do? We evaluate stability of natural slopes and man-made soil deposits; assess risks posed by site conditions. We understand soil mechanics and rock mechanics, and many of the aspects of geology, geophysics, hydrology, and other related sciences. ...

This branch of civil engineering that deals with the behavior of earth materials ensure that the structures we build today are able to stick over the surface of the earth, without tilting or sinking into the soil. Without geotechnical engineering principles, our roads, homes, dams and many other structures would literally be swallowed into the ground.
