An introduction to the Alliance, Policy and decision-making, NATO s civilian and military structures, The Alliances role in peacekeeping and peace-support operations, Combating new threats and developing new capabilities, The opening up of the Alliance to new member countries, Partnership and

cooperation, NATO-EU relations, The wider institutional framework for security, Programmes, activities, organisations and agencies,

The application of the right to life during armed conflict is an issue that polarizes opinion and generates considerable debate. Many believe that human rights law has no place in armed conflict, yet the European Court of Human Rights, and domestic courts, have ruled that it can apply. The exact contours of how the right to life applies during armed conflict remain largely unresolved. In this text, Ian Park seeks to clearly articulate the right to life obligations of states during both international and non-international armed conflict in respect of those individuals affected by the actions of states' armed forces and members of the armed forces themselves. In determining the right to life obligations of states, Park identifies the sources of law from which right to life obligations arise, how case law has developed and modified these obligations, and analyses how the law creates obligations in practice. Implicit in this analysis is a consideration of recent armed conflicts, and the actions of states, that lead to a series of concrete proposals designed to best ensure compliance with a state's right to life obligations.

NTTP 3-54M/MCWP 3-40.9 provides the commander with an operations security (OPSEC) overview, OPSEC evolution, and guidance for the most crucial aspect of OPSEC, that of identifying critical information (CI). It explains the OPSEC process, also known as the OPSEC five-step process. This publication addresses the areas of OPSEC and force protection, public affairs officer (PAO) interaction, the role of the Naval Criminal Investigative Service (NCIS) in coordination with OPSEC, the OPSEC/OMBUDSMAN/KEY VOLUNTEER relationship and the conduct of OPSEC assessments. This publication includes separate chapters on Web page registration, Web risk assessment, and Red team activity. Appendices provide guidance to implement effective plans/programs at the individual unit, strike group, and shore establishment levels. NWP 3-13 (FEB 2014), NAVY INFORMATION OPERATIONS, provides information operations guidance to Navy commanders, planners, and operators to exploit and shape the information environment and apply information-related capabilities to achieve military objectives. This publication reinforces the integrating functionality of information operations to incorporate information-related capabilities and engage in the information environment to provide a military advantage to the friendly Navy force. It is effective upon receipt. 1. NWP 1-14M/MCTP 11-10B/COMDTPUB P5800.7A (AUG 2017), THE COMMANDER'S HANDBOOK ON THE LAW OF NAVAL OPERATIONS, is available in the Navy Warfare Library. It is effective upon receipt and supersedes NWP 1-14M/MCWP 5-12.1/COMDTPUB 5800.7A (JUL 2007), The Commander's Handbook on the Law of Naval Operations. 2. Summary. This revision updates and expands upon various topics regarding the law of the sea and law of war. In particular, it updates the history of U.S. Senate consideration of the UN Convention on the Law of the Sea, to include its 2012 hearings; emphasizes that islands, rocks, and low-tide elevations are naturally formed and that engineering, construction, and land reclamation cannot convert their legal status; provides more detail on U.S. sovereign immunity policy for Military Sealift Command chartered vessels and for responding to foreign requests for health inspections and medical information; removes language indicating that all USN/USCG vessels under command of a noncommissioned officer are auxiliary vessels; emphasizes that only warships may exercise belligerent rights during international armed conflicts; adds a description of U.S.-Chinese bilateral and multilateral agreements promoting air and maritime safety; updates the international law applicable to vessels seeking a place of refuge; updates the description of vessels assimilated to vessels without nationality; provides detailed descriptions of the five types of international straits; states the U.S. position on the legal status of the Northwest Passage and Northern Sea Route; updates the list of international duties in outer space; updates the law regarding the right of safe harbor; adds "honor" as a law of war principle; adds information about weapons reviews in the Department of the Navy; updates the law regarding unprivileged enemy belligerents; includes information about the U.S. position on the use of landmines; expands on the discussion of the International Criminal Court (ICC); and updates the law of targeting.

Army Doctrine Publication (ADP) 1 is prepared under the direction of the Chief of Staff of the Army and is his vision for the Army. It states what the Army is, what the Army does, how the Army does it, and where the Army is going. It establishes the Army's contribution to America's landpower. ADP 1 delineates the Army's mission, purpose, and roles, deriving them from the Constitution; the Congress, in Title 10, United States Code; and the Department of Defense, in Department of Defense Directive 5100.01. Army doctrine supports and is consistent with joint doctrine. This publication connects Army doctrine to joint doctrine as expressed in the relevant joint publications, especially Joint Publication (JP) 1, Doctrine for the Armed Forces of the United States, and JP 3-0, Joint Operations. ADP 1 also links the National Security, National Defense, and National Military Strategies with the Army's operational doctrine in ADP 3-0. The principal audience of ADP 1 includes combatant commanders, other Services, all serving Soldiers, and all Army Civilians. All photographs in this publication are from Department of Defense photographic archives available online at DefenseImagery.mil and associated Army Web pages. ADP 1 implements the standardization agreement entitled Allied Joint Publication (AJP)-01, Allied Joint Doctrine. ADP 1 uses joint terms where applicable. For terms and their definitions in the text, the term is italicized and the number of the proponent publication follows the definition. ADP 1 applies to the Active Army, Army National Guard/Army National Guard of the United States, and United States Army Reserve unless otherwise stated. United States Army Combined Arms Center is the proponent for this publication. The preparing agency is the Combined Arms Doctrine Directorate, United States Army Combined Arms Center.

Field manual (FM) 3-13 provides doctrinal guidance and directions for conducting inform and influence activities (IIA) and discusses the importance of information in operational environments. It describes the Army's view of how IIA aid the commander to gain an advantage through information. It develops the other principles, tactics, and procedures detailed in subordinate doctrinal publications. The publication does not address every information-related capability commanders can use to help shape their complex operational environments. It should, however, generate introspection and provide just enough guidance to facilitate flexibility and innovative approaches for commanders to execute the art of command to inform and influence. It also provides guidance to the staff to conduct IIA to achieve the desired effects that support the commander's intent and objectives. Commanders designate an information-related capability and are only limited by available resources. The principal audience for FM 3-13 is commanders and staffs at all echelons of command, Army civilians, and government contractors. Commanders, staffs, and subordinates ensure their decisions and actions comply with applicable United States, international, and, in some cases, host nation laws and regulations. Commanders at all levels ensure their Soldiers operate according to the law of war and the rules of engagement. (See FM 27-10.) FM 3-13 implements standardization agreement (STANAG) Allied Joint Publication (AJP)-3 (B). FM 3-13 uses joint terms where applicable. Selected joint and Army terms and definitions appear in both the glossary and the text. Terms for which FM 3-13 is the proponent publication (the authority) have an asterisk (\*) in the glossary. Definitions for which FM 3-13 is the proponent publication are boldfaced in the text. For other definitions shown in the text, the term is italicized and the number of the proponent publication follows the definition. FM 3-13 applies to the Active Army, the Army National Guard (ARNG)/Army National Guard of the United States (ARNGUS), and the United States Army Reserve (USAR) unless otherwise stated. The proponent of FM 3-13 is the United States Army Combined Arms Center. The preparing agency is the Combined Arms Doctrine Directorate, United States Army Combined Arms Center.

"In the U.S. Army as elsewhere, transmission of digitized packets on Internet-protocol and space-based networks is rapidly supplanting the use of old technology (e.g., dedicated analog channels) when it comes to information sharing and media broadcasting. As the Army moves forward with these changes, it will be important to identify the implications and potential boundaries of cyberspace operations. An examination of network operations, information operations, and the more focused areas of electronic warfare, signals intelligence, electromagnetic spectrum operations, public affairs, and psychological operations in the U.S. military found significant overlap that could inform the development of future Army doctrine in these areas. In clarifying the prevailing boundaries between these areas of interest, it is possible to predict the progression of these boundaries in the near future. The investigation also entailed developing new definitions that better capture this overlap for such concepts as information warfare. This is important because the Army is now studying ways to apply its cyber power and is reconsidering doctrinally defined areas that are integral to operations in cyberspace. It will also be critical for the Army to approach information operations with a plan to organize and, if possible, consolidate its operations in two realms: the psychological, which is focused on message content and people, and the technological, which is focused on content delivery and machines."--Page 4 of cover.

The phrase "lessons learned is such a common one, yet people struggle with developing effective lessons learned approaches. The Lessons Learned Handbook is written for the project manager, quality manager or senior manager trying to put in place a system for learning from experience, or looking to improve the system they have. Based on experience of successful and unsuccessful systems, the author recognises the need to convert learning into action. For this to happen, there needs to be a series of key steps, which the book guides the reader through. The book provides practical guidance to learning from experience, illustrated with case histories from the author, and from contributors from industry and the public sector. The book is a practitioner-level guide to the design and the mechanics of lessons learned processes Takes a holistic approach, tracking lessons from identification to reapplication Makes the case for the assignment of actions for learning
