Historically group theory as an area of mathematics particularly relevant in theoretical physics first came to the fore in the 1930s directly because of its applications in quantum mechanics (or matrix mechanics as the Heisenberg formulation was then sometimes referred to).

Applied Group

theory for symmetry

Symmetry is the notion that an object of study may look the same from different points of view.

For instance, the chair in Figure 1.1 looks the same as its reflection in a mirror that would be placed in front of it, and our view on the
