To get step-by-step instructions select one of the following link accordingly to your... Learn Arduino...

[Getting Started with Arduino products | Arduino](#)
First, 3 variables are initialised for the 3 pins we are going to use. `int latchPin = 8; int clockPin = 12; int dataPin = 11;` Then, in setup, the pins are all set to Outputs. `pinMode(latchPin, OUTPUT); pinMode(clockPin, OUTPUT); pinMode(dataPin, OUTPUT);` The main loop simply runs a for loop counting from 0 to 255.

[A Complete Beginners Guide to the Arduino](#)
[Arduino Guide](#) If you 're just starting out with your new Arduino, or want to find out more before you jump in, you might find that getting all the information you need is a bit troublesome. Having to look here, there and everywhere for information might make you feel tentative about getting into the Arduino.

[The Complete Arduino Guide For Beginners - Codduino](#)
If we mention H19 for example, that refers to column H, row 19 on the breadboard. Step 1 – Insert black jumper wire into the GND (Ground) pin on the Arduino and then in the GND rail of the breadboard row 15. Step 2 – Insert red jumper wire into pin 13 on the Arduino and then the other end into F7 on the breadboard.
