We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

The overnight success of the 'Hoodride' phenomenon inspired a generation of car fanatics, who couldn't afford to restore a car to show condition but still wanted a good looking cool car. At last, you could be cool and stand out from the crowd on the tiniest of budgets. The look of the cars that resulted was often so honest, unspoiled and characterful, that it began to inspire the media, even Hollywood movie stars and celebrities. Whilst this has undoubtedly resulted in increased car values, and turned a brand of cars that had always been a cheap, honest mode of transportation into something cool with a high price tag, the generation it initially inspired has grown with the hobby, embracing the rising prices, finding ways to still be cool on a tight budget and producing a micro-industry that still manages to embrace the 'Built not bought' ethos. Patina Volkswagens, superbly illustrated with stunning colour photographs, takes an inside look at some of the key car builders, dealers, clubs and hobbyists, as well as the different styles of build, meaning every single car has a style all of its own.

Engines Covered1.8L turbo gasoline(engine codes: AEB, ATW, AWM)2.8L gasoline(engine codes: AFC, AHA, ATQ)Transmissions covered 5-speed Manual012, 01W, 01A5-speed Automatic01V

V.1 tune-up, electrical, V.2 engine, chassis.

By building a big-cube small block, you can have all the additional torque and horsepower of a big block, without all the extra weight, expense, and effort. In this all-new color edition, Graham Hansen takes a step-by-step approach to selecting the best OEM or aftermarket block, crank, rods, and pistons to construct your big-inch short block. He also discusses how to select the best heads, cam, induction and exhaust systems, specifically for a big-inch engine. In addition, the final chapter includes seven different combinations for big-inch power, complete with dyno graphs!
