On a small assembly line in Neckarsulm, Germany, no more than twenty exotic Audi R8 sports cars are built daily. The entire process is overseen by small teams of specialists that oversee every step of production. Every single part is inspected carefully, and nothing goes unchecked. It is a level of hand-built quality one might expect to find in a Ferrari Enzo or the Vector W8A of the 1980s, but almost unheard of from a manufacturer the size of Audi AG. The Turbo Quattro Coupe (or Urquattro) of the early 1980s was largely assembled by hand much in the same way, but Audi has refined the process for the R8 and has introduced one of the most spectacular sports cars ever. I hope this book will provide a better insight into the design, development, and production of this magnificent automobile.

Set in the late noughties, Season of Sid is a comic novel with a twist. It tells the story of Sid Karim, the first Asian football star in the Premier League, who is visited by his mentor Ibrahim 'Gerd' Mullah, and handed a strange gift: a hand-stitched football with a secret code. Sid puts the gift into his bag and thinks nothing more of it - he's got more important things on his mind, like playing for his team, creating chances and scoring goals. But when the two men meet again, in a ghoulish, empty stadium, Mullah tells Sid that he is dying and he has one final wish: he wants Sid to marry his daughter. But Sid thinks these arrangements are absurd and medieval. He's climbed to the top of the ladder of liberation and he's not coming down any time soon. But when he eventually meets Mullah's daughter, his feelings begin to change... Season of Sid will appeal to fans of comic fiction. Author Nasser is inspired by Kurt Vonnegut and filmmakers, most notably Werner Herzog, Krystof Keislowski and Lindsay Anderson.

An abused woman decides to escape her marriage—and learns how much a life can change in just thirty-four days—in this taut psychological thriller. Anna and Ray have been married for thirty-five years. Their three children are grown; they have grandkids; and to outsiders they appear to be a normal couple. But behind closed doors, something isn't right. On the day of their wedding anniversary, Anna makes a decision that changes everything and throws her family into turmoil. But as she browses online for a place of her own in Sheffield, England, she doesn't know that she isn't the only one who has suffered—and by leaving Ray, she will spark a series of events so awful that they might just end in murder...

In chassis development, the three aspects of safety, vehicle dynamics and ride comfort are at the top of the list of challenges to be faced. Addressing this triad of challenges becomes even more complex when the chassis is required to interact with assistance systems and other systems for fully automated driving. What is more, new demands are created by the introduction of modern electric and electronic architectures. All these requirements must be met by the chassis, together with its subsystems, the steering, brakes, tires and wheels. At the same time, all physical relationships and interactions have to be taken into account.
