Beginning at the turn of the century, Rudolf Steiner began to express a passionate interest in Christianity. For him, the event he called the "Mystery of Golgotha" is more than the central event of Christianity; it is, in fact, the turning point in time for all human and earthly evolution. In his Autobiography, Steiner clarified his views on Christianity: Some of what I said and wrote during that period [1890s] seems to contradict the way I described Christianity later on. This is because, when I wrote the word Christianity, I was referring to the teachings of a "world beyond" that was active in all Christian doctrines at the time. The whole meaning of religious experiences pointed to a world of spirit, one that was supposed to be unattainable by human intellect. Whatever religion might have to say and whatever precepts for moral life it might offer arise from what is revealed to human beings from outside. My own direct, inner perception of spirit objected to this; it wanted to experience the worlds of both spirit and the physical in perceptions of the human being and nature. And my ethical

individualism objected to this. It rejected the external support of commandments for morality; such support came instead as the result of spiritual soul development within the human being, where divinity lives. That was a trying time for my soul as I looked at Christianity. This period lasted from the time I left the Weimar work until I wrote my book Christianity as Mystical Fact. These kinds of tests are obstacles, placed in one's path by destiny (or karma), and they must be overcome through spiritual development. In these talks, Rudolf Steiner offers his profound insights into the essential truths behind the Christ event, as well as the historic and prehistoric events—on Earth and in the spiritual worlds—leading up to the turning point in time. He shows that the ancient mysteries of the East, the Persians, the Egyptians, the Greeks, and the streams behind those impulses—going back to Atlantis and Lemuria—all lead to the event of Christ's incarnation and the Mystery of Golgotha, through which the Earth became the body of Christ. Further, Steiner talks about what those events mean for the future of humanity and the Earth. The Gospel of St. John and Its Relation to the Other Gospels is an essential document in the literature of Christology and for understanding the central place of esoteric Christianity in Anthroposophy.

Logan and his friend Benedict run into the wrong guy at the library - literally. When Logan slams into the reference guy in the basement and gives him a little lip, Logan gets punished, really and truly punished. He has three days to complete three tasks before Professor Wordsworth will lift the magical punishment that keeps getting Logan in even more trouble.

The rapid conversion of land to urban and suburban areas has profoundly altered how water flows during and following storm events, putting higher volumes of water and more pollutants into the nation's rivers, lakes, and estuaries. These changes have degraded water quality and habitat in virtually every urban stream system. The Clean Water Act regulatory framework for addressing sewage and industrial wastes is not well suited to the more difficult problem of stormwater discharges. This book calls for an entirely new permitting structure that would put authority and accountability for stormwater discharges

at the municipal level. A number of additional actions, such as conserving natural areas, reducing hard surface cover (e.g., roads and parking lots), and retrofitting urban areas with features that hold and treat stormwater, are recommended.
