~~Cathodic Protection System Guidelines Nwglde~~

Cathodic protection (CP) is a technique used to control the corrosion of a metal surface by making it the

Get Free Cathodic Protection System Guidelines Nwglde

cathode of an electrochemical cell. A simple method of protection connects the metal to be protected to a more easily corroded "sacrificial metal" to act as the anode. The sacrificial metal then corrodes instead of the protected metal.

~~Performance Measures Guide For ...~~

The weight criterion involves calculation of the weight of anode material needed to ensure a required level of current density for the life of the cathodic protection system. The designer is required to determine the desired life of the system and the utilization factors for the anode. The polarization criterion facilitates specification of anode area that must be provided initially when the structure is first placed in water to ensure that adequate current is available to polarize the ...
