user manual version 3 - Melodyne

In Melodyne editor, if after manual selection of the algorithm Polyphonic no notes can be detected in the material during the analysis, the percussive algorithm will be selected automatically, since otherwise it would be impossible to make any notes at all available for editing. Depending upon the material, it can be necessary to edit the detection manually and reassign detected notes. This ...

Melodyne Editor Manual - aplikasidapodik.com

Capstan's detection of notes and their fluctuations is based on the patented DNA Direct Note Access technology made famous by Melodyne, an application used in studios all over the world for the editing of pitch and timing. Unlike Melodyne, however, Capstan employs DNA note detection exclusively to remove wow and flutter by means of varispeed.
