This was a company town in the truest sense of the word. By the 1950s, the Kennecott Copper Corporation was the owner of both the mine and Santa Rita itself. Mining operations had become so large scale that the pit surrounded the town. Santa Rita had to go. Now there is only empty air where the town used to be.

Copper mining in the area began late in the Spanish colonial period, but it was not until 1803 that Francisco Manuel Elguea, a Chihuahua banker and businessman, founded the town of Santa Rita. He named it Santa Rita del Cobre (Saint Rita of the Copper), after Saint Rita of Cascia and the existing mine. During the early 19th century the mine produced over 6 million pounds of copper annually. The crudely smeltered ore was shipped to Chihuahua for further smelting and then sent to Mexico City ...

Copper Mining in Santa Rita, New Mexico, 1801-1838: Lundwall, Helen J., Humble, Terrence, Lundwall, Helen: Amazon.com.au: Books

The Spanish, Mexicans, and Americans, successively, mined copper for more than 200 years in Santa Rita, New Mexico. Starting in 1799 after an Apache man led the Spanish to the native copper deposits, miners at the site followed industry developments in the nineteenth century to create a network of underground mines. In the early twentieth century these works became part of the Chino Copper Company's open-pit mining operations-operations that would overtake Santa Rita by 1970. In Santa Rita del Cobre, Huggard and Humble detail these developments with in-depth explanations of mining technology, and describe the effects on and consequences for the workers, the community, and the natural environment. Originally known as El Cobre, the mining-military camp of Santa Rita del Cobre ultimately became the company town of Santa Rita, which after World War II evolved into an independent community. From the town's beginnings to its demise, its mixed-heritage inhabitants from Mexico and United States cultivated rich family, educational, religious, social, and labor traditions. Extensive archival photographs, many taken by officials of the Kennecott Copper Corporation, accompany the text, providing an important visual and historical record of a town swallowed up by the industry that created it.

"Santa Rita del Cobre" is the story of the formative years (1801-1838) of a remarkable mine in southwestern New Mexico that has produced copper for more than 200 years. Records of the Spanish Colonial and early Mexican period have yielded intriguing accounts of the people involved in the early development of the mines, the difficulties they encountered along the way, and the importance of this small settlement to the history of the frontier. Although the Santa Rita mines produced a fortune to the few men willing or able to invest money in their development, it was always a difficult and hazardous undertaking. Apaches, who inhabited much of southern New Mexico and Arizona at that time, created many problems for the miners. They had a strong influence over the success or failure of the Santa Rita mining operation. At times the hostility and depredations of these Indians overshadowed the remarkable success of the mines. Santa Rita was the center for military operations against the Apaches, and was referred to as the watchtower and guardian of the western frontier. Helen Lundwall is a retired librarian. She edited and annotated "Pioneering in Territorial New Mexico: The Memoirs of H. B. Ailman," and is the author of several articles on local history. TERRENCE HUMBLE was born and raised in Santa Rita, New Mexico. He worked at the Santa Rita mine for 32 years, and is an authority on the history of the mine. His articles have been published in the "Mining History Association Journal" and the

This book is written as Cuentos, short stories, of my life growing up in small rough mining towns in Arizona and New Mexico. Although I wrote it as a humorous book it was not an enjoyable time for us growing up with with no English spoken in our homes. We were oftentimes punished for speaking in our native language, Spanish in class or even during playground times. I quickly learned that education was the key for me to enjoy a better life than my parents ever had. I instilled in my sons the value of education for them to succeed in their lives. I wrote this as short stories that will hopefully paint a complete picture of my life as it unfolded over the last seventy years.
