Read Free Corona Performance Of High

The corona effect will occur in high voltage systems unless sufficient care is taken to limit the strength of the surrounding electric field. Corona discharge can cause an audible hissing or cracking noise as it ionizes the air around the conductors. This is

Read Free Corona Performance Of High

common in high voltage electric power transmission lines. The corona effect can also produce a violet glow, production of ozone gas around the conductor, radio interference, and electrical power loss.

Corona Discharge: What is the
Corona Effect? | Electrical4U

A corona discharge is an electrical discharge caused by the ionization of a fluid such as air surrounding a conductor carrying a high voltage. It represents a local region where the air has
