Over the past two decades, the United States has successfully deregulated prices and restrictions on most previously-

File Type PDF Cpcu 540 Hard

regulated industries, including airlines, trucking, railroads, telecommunications, and banking. Only a few industries remain regulated, the largest being the property-liability insurance business. In light of recent sweeping financial modernization legislation in other

File Type PDF Cpcu 540 Hard

sectors of the insurance industry, this timely volume examines the basis for continued regulation of rates and forms of the U.S. property-liability insurance market. The book focuses on private passenger automobile insurance—the most important personal

Cpcu 540 Hard

line of property-liability coverage, with annual premiums of about \$120 billion.

The authors analyze five state case studies: California, Massachusetts, and New Jersey—three of the most heavily regulated states—as well as Illinois, which has been deregulated for about 30 years,

File Type PDF Cpcu 540 Hard

and South Carolina, which began to deregulate in 1997.

The study also includes an econometric analysis based on all fifty states over a 25-year period that gauges the impact of regulation on insurance price levels, price volatility, and the proportion of

automobiles insured in residual markets. The authors conclude that regulation does not significantly reduce long-run prices for consumers, and generally limits availability of coverage, reduces the quality and variety of services available in the market, inhibits productivity growth,

and increases price volatility. Contributors include Dwight Jaffee (University of California, Berkeley), Thomas Russell (Santa Clara University), Laureen Regan (Temple University), Sharon Tennyson (Cornell University), Mary Weiss (Temple University), John
