Developing Policies and Protocols in the Age of Evidence ...

#1: Helps clinicians stay current on standardized, evidence-based protocols. There's an explosion of scientific knowledge being published, making it difficult for clinicians to stay current on medical best practices. In fact, for a primary care physician to stay up to date, they'd need to read 17 articles a day, 365 days a year. This is an impossible task, but evidence-based medicine offers clinicians a way to stay current with best practices using standardized, evidence-based protocols.
