Abstract. This book provides
a comprehensive yet short
description of the basic
concepts of complex network
theory and the code to
implement this theory.

Differently from other
books, we present these
concepts starting from real

distribution: most of the nodes in the network have a low connection degree, whereas few nodes have a very high connection degree (Albert et al., 2000; Jeong et al. 2000, 2001; Strogatz 2001; Wolf et al. 2002; Bray 2003). The high-degree nodes dominate the network structure and are called hubs of the network.
