This captivating ethnography explores Vietnam's sex industry as the country ascends the global and regional stage. Over the course of five years, author Kimberly Kay Hoang worked at four exclusive Saigon hostess bars catering to diverse clientele: wealthy local Vietnamese and Asian businessmen, Viet Kieus (ethnic Vietnamese living abroad), Western businessmen, and Western budget-tourists. *Dealing in Desire* takes an in-depth and often personal look at both the sex workers and their clients to show how Vietnamese high finance and benevolent giving are connected to the intimate spheres of the informal economy. For the domestic super-elite who use the levers of political power to channel foreign capital into real estate and manufacturing projects, conspicuous consumption is a means of projecting an image of Asian ascendancy to potential investors. For Viet Kieus and Westerners who bring remittances into the local economy, personal relationships with local sex workers reinforce their ideas of Asia's rise and Western decline, while simultaneously bolstering their diminished masculinity. *Dealing in Desire* illuminates Ho Chi Minh City's sex industry as not just a microcosm of the global economy, but a critical space where dreams and deals are traded.

"This fascinating ethnography examines one segment of Vietnam's diverse sex industry. Between 2006 and 2010, author Kimberly Kay Hoang was employed at four exclusive Saigon hostess bars catering to high-end clientele: wealthy Asian businessmen, Western expatriates and tourists, local Vietnamese men, and Viet Kieus (ethnic Vietnamese living abroad). Using participant observation and in-depth interviews with the sex workers, bar owners, managers, and mostly rich clients at all four locations, Hoang argues that Vietnam's high-end sex industry is much more than a byproduct of globalization--it's an integral component of the country's free-market capitalism, including its emergence as a regional economic player. Major business deals in Vietnam often occur within hostess bars, which businessmen use to stage a display of power, forge relationships, and impress clients. Hostesses facilitate these transactions by socializing with clients, as well as fulfilling fantasies of the flesh and of the culture. The author reveals how recent changes in the political economy have shaped the social structure of sex work in the country, just as actors involved in the sex industry have actively shaped Vietnam's political economy. Multiple constructions of gender are emerging across local, national, and global socio-spaces from the bottom up and the top down"--Provided by publisher.

Analyzes female agency, gendered violence, and transactional sex in contemporary Papua New Guinea. Focusing on Huli "passenger women," this work explores the socio-economic factors that push women into the practice of transactional sex, and asks how these transactions might be an expression of resistance, or even revenge.

First Published in 1998. Routledge is an imprint of Taylor & Francis, an informa company.

This collection of new and classic writings about the sex industry asks us to think about the differences between our society's treatment of prostitution and pornography, while investigating how liberalism deals with the sex industry in general.

Migrant women are the primary source of paid domestic labor around the world. Since the 1980s, the newly prosperous countries of East Asia have recruited foreign household workers at a rapidly increasing rate. Many come from the Philippines and Indonesia. Pei-Chia Lan interviewed and spent time with dozens of Filipina and Indonesian domestics working in and around Taipei as well as many of their Taiwanese employers. On the basis of the vivid ethnographic detail she collected, Lan provides a nuanced look at how boundaries between worker and employer are maintained and negotiated in private households. She also sheds light on the fate of the workers, "global Cinderellas" who seek an escape from poverty at home only to find themselves treated as disposable labor abroad. Lan demonstrates how economic disparities, immigration policies, race, ethnicity, and gender intersect in the relationship between the migrant workers and their Taiwanese employers. The employers are eager to flex their recently acquired financial muscle; many are first-generation career women as well as first-generation employers. The domestics are recruited from abroad as contract and "guest" workers; restrictive immigration policies prohibit them from seeking permanent residence or transferring from one employer to another. They care for Taiwanese families' children, often having left their own behind. Throughout *Global Cinderellas*, Lan pays particular attention to how the women she studied identify themselves in relation to "others"—whether they be of different classes, nationalities, ethnicities, or education levels. In so doing, she offers a framework for thinking about how migrant workers and their employers understand themselves in the midst of dynamic transnational labor flows.

Investigates race and racism in the U.S. exotic dance industry.

Examines how immigrants acquire American ideas about race, both pre- and post-migration, in light of U.S. military presence and U.S. cultural dominance over their home country, drawing on interviews and ethnographic observations of Koreans in Seoul and Los Angeles.

In this important contribution both to the study of social protest and to French social history, Roger Gould breaks with previous accounts that portray the Paris Commune of 1871 as a continuation of the class struggles of the 1848 Revolution. Focusing on the collective identities framing conflict during these two upheavals and in the intervening period, Gould reveals that while class played a pivotal role in 1848, it was neighborhood solidarity that was the decisive organizing force in 1871. The difference was due to Baron Haussmann's massive urban renovation projects between 1852 and 1868, which dispersed workers from Paris's center to newly annexed districts on the outskirts of the city. In these areas, residence rather than occupation structured social relations. Drawing on evidence from trial documents, marriage records, reports of police spies, and the popular press, Gould demonstrates that this fundamental rearrangement in the patterns of social life made possible a neighborhood insurgent movement; whereas the insurgents of 1848 fought and died in defense of their status as workers, those in 1871 did so as members of a besieged urban community. A valuable resource for historians and scholars of social movements, this work shows that collective identities vary with political circumstances but are nevertheless constrained by social networks. Gould extends this argument to make sense of other protest movements and to offer predictions about the dimensions of future social conflict.
