Die-cutting-and-tooling-Label-Academy

Die-cutting tooling is a fundamental requirement of the carton and corrugated box manufacture process. Such tooling is made in 90% of cases by a third party specialist die-making organisation. As such it has a direct cost through normal procurement channels.

Die-Cutting-Tooling-truforniaserdies.com

A Cutting Die - Tooling Used for Custom Boxes These dies are composed of metal strips called "rule". The rule is sharpened for cutting through the paperboard (or chipboard or corrugated fiberboard) or left slightly dull for scoring areas used for the closing flaps of the folding carton for example, and any other areas where the box will naturally fold.

Tooling for Packaging Part One - The Cutting Die

Amazon.co.uk: die-cutting-machines

Die cutting is the general process of using a die to shear webs of low-strength materials, such as rubber, fibre, foil, cloth, paper, corrugated fibreboard, chipboard, paperboard, plastics, pressure-sensitive adhesive tapes, foam, and sheet metal. In the metalworking and leather industries, the process is known as clicking and the machine may be referred to as a clicking machine. When a dinking die or dinking machine is used, the process is known as dinking. Commonly produced items using this pr
