Virginia as well as a review of court decisions since that 2002 ruling • Details the diagnostic issues related to determination of intellectual disability, such as the assessment of intellectual functioning, adaptive behavior, and age of onset • Shares best practices in clinical assessment and important forensic matters that must be considered

One of the most devastating losses a family can experience is the loss of a child. Whether the loss is through illness, accident, drugs, suicide or other tragedy, the pain is overwhelming and often paralyzing. Often we think of "loss" as death. However, in our broken world there are many ways to suffer the loss of a child. This book discusses how a family can learn to cope with loss of a child due to not only death, but a custody battle, addiction (and other choices a child makes), chronic illness, crime (human trafficking, kidnap), and other issues where hopes and dreams disappear. Author helps readers through the grieving process, and assists them in finding God's grace and comfort during this very difficult time of life. This book is unique as it is for parents as well as grandparents.

Michael Perlin shows how the administration of the death penalty deprives persons with mental disabilities of their constitutional rights, and how trial courts and prosecutors consciously flaunt the law. Using real life examples, he brings this often overlooked situation to light and calls for immediate change.

Financial Planning Basics for Doctors is a comprehensive guide on building a long-term financial plan for doctors and their families. Subjects covered include student loans, home buying, disability insurance, estate planning, college planning, retirement planning, investments, and behavioral finance, among many others. Each chapter starts with the basics before addressing more advanced concepts, frequently with examples and graphs, and concludes with a concise summary of the key takeaways. Throughout the book, there are links to free downloadable spreadsheets and a planning checklist to help you jump-start and organize your financial plan. The content provided is a result of the feedback the authors have received over thousands of meetings with doctors, condensed into a thorough overview of the most relevant ideas. Teaching hospitals do an excellent job of training our next generation of doctors, yet most new physicians graduate without having had a class on managing their finances. This book was written to fill that knowledge gap. Marshall Weintraub, Michael Merrill, and Cole Kimball are financial advisors with Finity Group, LLC, a financial planning firm specializing in working with doctors.
