Place a bit into the "V" groove on the back face of the block. Place the block into a vise so the end of the bit rests on top of and against the jaws and so that it just barely extends above the angled surface of the block. Turn the bit so the leading edge of the first half follows the guide line. Use a "C" clamp to hold the bit in place.

A drill bit is an essential accessory for any drill, used for creating holes in various materials with a circular cutting motion that removes the material leaving you with a clean hole. It's important not to use a drill bit that exceeds the maximum drilling capacities of a drill as this could cause damage to the tool.
