□A searing and emotionally gripping account of a young black girl growing up to become a strong black woman during the most difficult time of racial segregation.□□Professor Charles Ogletree, Harvard Law School □Provides important context for an important moment in America's history.□□Associated Press

When fourteen-year-old Carlotta Walls walked up the stairs of Little Rock Central High School on September 25, 1957, she and eight other black students only wanted to make it to class. But the journey of the □Little Rock Nine,□ as they came to be known, would lead the nation on an even longer and much more turbulent path, one that would challenge prevailing attitudes, break down barriers, and forever change the landscape of America. For Carlotta and the eight other children, simply getting

through the door of this admired academic institution involved angry mobs, racist elected officials, and intervention by President Dwight D. Eisenhower, who was forced to send in the 101st Airborne to escort the Nine into the building. But entry was simply the first of many trials.

Breaking her silence at last and sharing her story for the first time, Carlotta Walls has written an engrossing memoir that is a testament not only to the power of a single person to make a difference but also to the sacrifices made by families and communities that found themselves a part of history.

"A great book written by a truly medical family ... This book will prove invaluable to the student paramedic and a great aid to the practicing paramedic ... The case studies are thought provoking and give an opportunity for students to learn about situations they will encounter during their careers and experienced paramedics and practitioners the opportunity to reflect on similar cases and question their practice ... I would highly recommend this book."

Paul Bates (Paramedic), Higher Education Programme Manager, London Ambulance Service NHS Trust, UK "Individuals new to pre-hospital care will find this text well structured and clear. The informative introduction and subsequent case studies are written in an easy to read question and

answer style. These provide a starting point for the reader to undertake further focused reading and investigation. A helpful text for students who are new to caring for patients, in the pre-hospital environment." Amanda Blaber, Senior Lecturer, University of Brighton, UK

"This book presents a series of medical vignettes of varying complexity. It discusses the differential diagnosis and clinical care, offering important background knowledge to assist the Paramedic in following the best clinical pathway. Fellows and Fellows provide the vital link between the classroom and reality, removing the mysticism from the complex and ever changing world of pre-hospital care" Dr David Zideman, Clinical Lead □ Emergency Medical Care, London Organising Committee of the Olympic and Paralympic Games "This is a great introductory text □ The language is easy to

read and does not use over complicated medical jargon, which can be off putting for novice students (and experienced ambulance personnel alike!) whilst introducing the reader to "ambulance language". The comprehensive glossary is an unexpected find and a fabulous revision tool, explaining many difficult medical concepts and conditions." Emma Redwood, State Registered Paramedic, University of Northampton, UK "Until now there have been very few books that outline the importance of all stages of the care received by a patient. This book fills that gap without overwhelming those new to the paramedic profession. In addition it works well as a supplementary book for anyone working in the pre-hospital field to remind them the importance of seeking a differential diagnosis and not jumping to any conclusions ... A good book for paramedic students to read and enjoy."
