Having established a good base for selling cars the MG Company changed the styling for the TD into a much more comfortable and modern vehicle. Again the sales exploded and in three years built nearly three times the number of TC the previous year. The extra boost give by the Mk II kept it going until the TF arrived. This had an even more drastic styling change and not only was it not appreciated, despite a larger engine being fitted, it did not keep up with the current vogue for all enveloping bodies. This only lasted two years until the radically different MGA appeared in 1955. This is a book of contemporary road tests, new model introductions, trials, racing record breaking, service data, technical & performance data. Models covered include:- TD, MkII, TD Record Breaker, Lester-MG, Cooper-MG, TF1250, TF1500, EX179.

We all have a drawer or closet full of old discarded tech just sitting around, gathering dust. Memories of a bygone technological era that have been replaced by newer, shiner, smarter devices. What can you do with them? Most of us don't even know how to properly dispose of them. If only there was a way to save them from their untimely fate. Hidden inside often-discarded devices is a treasure trove of motors, magnets, screens, and other parts just waiting for a chance to be upcycled! How to make a great Wi-Fi security camera with an old cell phone · How to make a basic 3D printer out of old computer disk drives · What can be made with the rare-earth magnets inside old hard drives or the reusable LCD screens in old phones · And much more Fans of Popular Science, Smithsonian's Maker Lab, and The Big Book of Makerspace Projects will love Upcycled Technology.
