To explore Christian-Muslim relations at the dawn of the modern age, this book examines Nicholas of Cusa 's seminal works on the Qur ' an and world religions. It also considers Muslim responses to Christianity and other Christian writings on Islam.

'The best business book I've ever read.' Bill Gates, Wall Street Journal 'The Michael Lewis of his day.' New York Times What do the \$350 million Ford Motor Company disaster known as the Edsel, the fast and incredible rise of Xerox, and the unbelievable scandals at General Electric and Texas Gulf Sulphur have in common? Each is an example of how an iconic company was defined by a particular moment of fame or notoriety. These notable and fascinating accounts are as relevant today to understanding the intricacies of corporate life as they were when the events happened. Stories about Wall Street are infused with drama and adventure and reveal the machinations and volatile nature of the world of finance. John Brooks's insightful reportage is so full of personality and critical detail that whether he is looking at the astounding market crash of 1962, the collapse of a well-known brokerage firm, or the bold attempt by American bankers to save the British pound, one gets the sense that history really does repeat itself. This business classic written by longtime New Yorker contributor John Brooks is an insightful and engaging look into corporate and financial life in America.

Huddersfields Roll of Honour 1914-1922 is a detailed account of 3,439 service personnel from Huddersfield who lost their lives during the First World War. In the Preface, HRH The Duke of York KG writes: This publication represents the lifetime work of Margaret Stansfield who sadly passed away in 2012. Margaret spent 30 years compiling the 3,439 biographical entries giving a poignant insight into the background, working lives and families of those who selflessly left Huddersfield to fight for their country never to return. Along with the biographical accounts there are many moving letters to the families of soldiers who lost their lives reflecting an attempt to bring comfort amid the darkness that their loss brought to both families and comrades alike.

Written by leading figures in the field, this third edition of the Principles of Banking Law provides an authoritative account of the subject, incorporating all significant changes in banking law, regulation, and practice that have occurred since the publication of the second edition in 2002. The authors offer a thoughtful and contextual treatment of domestic and international banking and financial services law, with in-depth expert coverage of global bank regulation, payment systems, lending, and trade finance.

Since its early years, the United Nations has issued a series of international recommendations on population and housing censuses under the title " Principles and Recommendations for Population and Housing Censuses ". These publication series, which are based on good national practices in census taking, are widely used by national statistical offices and census officials in countries throughout the world in planning and carrying out population and housing censuses, as well as other related data collection activities, particularly demographic and socio-economic surveys. The recommendations provide guidance on the main characteristics of population and housing censuses, general material on census methodology, planning, and operations, and more detailed guidance on the content of censuses, in terms of topics for population and also housing. These series are currently revised to assist countries in preparing for the 2020 round of censuses by taking into account changes in methodology, technology, as well as the need for better data dissemination and utilization.

The population and housing census is part of an integrated national statistical system, which may include other censuses (for example, agriculture), surveys, registers and administrative files. It provides, at regular intervals, the benchmark for population count at national and local levels. For small geographical areas or sub-populations, it may represent the only source of information for certain social, demographic and economic characteristics. For many countries the census also provides a solid framework to develop sampling frames. This publication represents one of the pillars for data collection on the number and characteristics of the population of a country.

When Calouste Gulbenkian died in 1955 at the age of 86, he was the richest man in the world, known as 'Mr Five Per Cent' for his personal share of Middle East oil. The son of a wealthy Armenian merchant in Istanbul, for half a century he brokered top-level oil deals, concealing his mysterious web of business interests and contacts within a labyrinth of Asian and European cartels, and convincing governments and oil barons alike of his impartiality as an 'honest broker'. Today his name is known principally through the Gulbenkian Foundation in Lisbon, to which his spectacular art collection and most of his vast wealth were bequeathed. Gulbenkian's private life was as labyrinthine as his business dealings. He insisted on the highest 'moral values', yet ruthlessly used his wife's charm as a hostess to further his career, and demanded complete obedience from his family, whom he monitored obsessively. As a young man he lived a champagne lifestyle, escorting actresses and showgirls, and in later life - on doctor's orders - he slept with a succession of discreetly provided young women. Meanwhile he built up a superb art collection which included Rembrandts and other treasures sold to him by Stalin from the Hermitage Museum. Published to mark the 150th anniversary of his birth, Mr Five Per Cent reveals Gulbenkian's complex and many-sided existence. Written with full access to the Gulbenkian Foundation's archives, this is the fascinating story of the man who more than anyone else helped shape the modern oil industry.
