There is a wealth of
research and literature
explaining suburban
sprawl and the urgent
need to retrofit suburbia.
However, until now
there has been no single

guide that directly
explains how to repair
typical sprawl elements.

The Sprawl Repair
Manual demonstrates a
step-by-step design
process for the re-
balancing and re-
urbanization of suburbia
into more sustainable,
economical, energy- and
resource-efficient
patterns, from the region
and the community to

the block and the individual building. As Galina Tachieva asserts in this exceptionally useful book, sprawl repair will require a proactive and aggressive approach, focused on design, regulation and incentives. The Sprawl Repair Manual is a much-needed, single-volume reference for fixing sprawl,

incorporating changes into the regulatory system, and implementing repairs through incentives and permitting strategies. This manual specifies the expertise that's needed and details the techniques and algorithms of sprawl repair within the context of reducing the financial and ecological footprint

of urban growth. The Sprawl Repair Manual draws on more than two decades of practical experience in the field of repairing and building communities to analyze the current pattern of sprawl development, disassemble it into its elemental components, and present a process for transforming them

into human-scale,
sustainable elements.

The techniques are
illustrated both two- and
three-dimensionally,
providing users with
clear methodologies for
the sprawl repair
interventions, some of
which are radical, but all
of which will produce
positive results.
