Product Description: The billions of dollars expended in Iraq constitute the largest relief and reconstruction exercise in American history. SIGIR's lessons learned capping report characterizes this effort in four phases (pre-war to ORHA, CPA, post-CPA/Negroponete era, and Khalilzad, Crocker, and the Surge). From this history, SIGIR forwards a series of conclusions and recommendations for Congress to consider when organizing for the next post-conflict reconstruction situation. Over the past five years, the United States has provided nearly fifty billion dollars for the relief and reconstruction of Iraq. This unprecedented rebuilding program, implemented after the March 2003 invasion, was developed to restore Iraq's essential services, build Iraq's security forces, create a market-based economy, and establish a democratic government—all in pursuit of U.S. interests in a stable and free Iraq. Did the U.S. rebuilding program achieve its objectives? Was the money provided well-spent or wasted? What lessons have we learned from the experience? *Hard Lessons: The Iraq Reconstruction Experience*, a report from the Special Inspector General for Iraq Reconstruction (SIGIR), answers these and other important questions by presenting a comprehensive history of the U.S. program, chiefly derived from SIGIR's body of extensive oversight work in Iraq, hundreds of interviews with key figures involved with the reconstruction program, and thousands of documents evidencing the reconstruction work that was - or was not - done. The report examines the limited pre-war planning for reconstruction, the shift from a large infrastructure program to a more community-based one, and the success of the Surge in 2007 and beyond. *Hard Lessons* concludes that the U.S. government did not have the structure or resources in place to execute the mammoth relief and reconstruction plan it took on in 2003. The lessons learned from this experience create a basis for reviewing and reforming the U.S. approach to contingency relief and reconstruction operations.

A combination of poor planning, weak oversight and greed cheated U.S. taxpayers and undermined American forces in Iraq and Afghanistan. U.S. taxpayers have paid nearly \$51 billion for projects in Iraq, including training the Iraqi army and police and rebuilding Iraq's oil, electric, justice, health and transportation sectors. Many of the projects did not succeed, partly because of violence in Iraq and friction between U.S. officials in Washington and Iraqi officials in Baghdad. The U.S. gov't. "was neither prepared for nor able to respond quickly to the ever-changing demands" of stabilizing Iraq and then rebuilding it. This report reviews the problems in the war effort, which the Bush admin. claimed would cost \$2.4 billion. Charts and tables.

In a lively critique of how international and comparative political economy misjudge the relationship between global markets and states, this book demonstrates the central place of the American state in today's world of globalized finance. The contributors set aside traditional emphases on military intervention, looking instead to economics.

This book analyzes shifting international taxation strategies in pursuit of tax nomads, individuals and companies who minimize their tax obligations among multiple countries. Focusing on the efforts of the United States, the collective endeavours of the European Union and the global initiative of the OECD under G20 guidance, it investigates their attempts to understand and control the mechanisms employed by such nomads. The author directs particular attention to intellectual property, used by multinational corporations to move income from high-tax to low-tax locations. Contrary to claims that globalization hinders tax collection, Vlcek argues that state sovereignty and state power remain the defining characteristic of international taxation. The EU and OECD in turn, he concludes, are leveraging cooperation with the US to force other countries to share taxpayer information with them. This significant work will interest economists, political scientists and tax experts. /div

Moderne Diplomatie wirkt heute in viele Bereiche des modernen Lebens hinein. Sie ist zugleich selbst neuen Einflüssen ausgesetzt. Faktoren, die unsere Gesellschaften verändern, verändern auch unser Regierungshandeln, auch in der Außenpolitik, seien es Digitalisierung, emotionalisierte Sensibilitäten unserer Öffentlichkeiten oder nicht-staatliche internationale Akteure. Derartige Entwicklungen müssen von der Diplomatie aufgenommen werden, damit sie weiter als Instrument einer Regierung funktionieren kann. Regierungen sollten Wege finden, zwischen den neuen Bedürfnissen der Gesellschaft und den Notwendigkeiten legitimen Regierungshandelns zu vermitteln. Das Ziel sollte sein, als souveräner Staat handeln zu können und zugleich das Potential der tiefgreifenden gesellschaftlichen Veränderungen zu nutzen. Mit Beiträgen von Volker Stanzel, Sascha Lohmann, Andrew Cooper, Christer Jönsson, Corneliu Bjola, Emillie V. de Keulenaar, Jan Melissen, Karsten D. Voigt, Kim B. Olsen, Hanns W. Maull und R. S. Zaharna

This is a major new collection examining the economic and political challenges currently faced by multilateral and transnational governance institutions.

Publisher description

This book widens the current debate on security privatization by examining how and why an increasing number of private actors beyond private military and security companies (PMSCs) have come to perform various security related functions. While PMSCs provide security for profit, most other private sector stakeholders make a profit by selling goods and services that were not originally connected with security in the traditional sense. However, due to the continuous introduction of new legal and technical regulations by public authorities, many non-security-related private businesses now have to perform at least some security functions. This volume offers new insights into security practices of non-security-related private businesses and their impact on security governance. The contributions extend beyond the conceptual and theoretical arguments in the existing body of literature to offer a range of original case studies on the specific roles of non-security-related private companies of all sizes, from all areas of business and from different geographic regions.
