Imaging of head and

Where To Download Head

neck (HN) cancer is a challenge for many radiologists and largely due to the challenging anatomy in a small volume of the body. Additionally, multiple pathologies and the absence of an agreed-upon standard imaging protocol for staging and surveillance add complexity in choosing the most appropriate

spread to is the lungs.

Also, patients with head and neck cancer

(especially if they are/were smokers) can

have a separate lung cancer unrelated to the head and neck cancer.

Your doctor may order a simple chest x-ray or CT scan of the chest to investigate.
