Introduction to Business covers the scope and sequence of most introductory business courses. The book provides detailed explanations in the context of core themes such as customer satisfaction, ethics, entrepreneurship, global business, and managing change. Introduction to Business includes hundreds of current business examples from a range of industries and geographic locations, which feature a variety of individuals. The outcome is a balanced approach to the theory and application of business concepts, with attention to the knowledge and skills necessary for student success in this course and beyond.

Accelerate your Mac! Updated 01/23/2019 If your Mac seems a lot slower now than when you first bought it, it's not your imagination. Over time, your Mac can become bogged down with extra background tasks, run out of free RAM and disk space, and encounter a wide variety of other issues that lead to slow performance. With expert advice and a little detective work, you can find and fix these problems—returning your Mac to its original, peppy self. Don't depend on random tips that may or may not help. In this book you'll learn how to find and address the exact causes of slow behavior, with before-and-after tests to confirm your results. You'll discover how to optimize CPU and RAM usage, eliminate disk bottlenecks, improve network performance (including web browsing and email), speed up peripherals, perform strategic software and hardware upgrades, and much more. This book covers 10.9 Mavericks or later, including 10.14 Mojave. In this practical, hands-on book, Joe Kissell shares the results of his extensive research: • Learn the Basics: Separate fact from fiction when it comes to commonly recommended performance tips. • Diagnose Speed Issues: Use benchmarking and other diagnostic tools to pinpoint speed problems and test your fixes. • Try Quick Fixes: Discover the most effective techniques for overcoming random, temporary speed problems. • Lighten Your CPU's Load: Track down apps that are bogging down your processor and teach them to behave. • Increase Available RAM: Turn off or manage processes that are using too much memory so there's more to work with. • Improve Disk Performance: Fix disk errors, avoid running out of space, and eliminate inefficient disk access. • Boost Network Speeds: Speed up Wi-Fi and Ethernet network access, DNS lookups, web browsing, and email. • Monitor System Resources: Use Activity Monitor and other tools to keep tabs on your Mac's CPU, RAM, disk, and network usage. • Upgrade Your Hardware: Learn when and how to install additional RAM, a new hard drive, an SSD, or other hardware upgrades.

American business folklore is awash with the adventures of successful entrepreneurs. Still, most of these stories are about Americans, neglecting important and courageous entrepreneurs from other countries. Made in Korea recounts the story of how Chung Ju Yung rose from poverty to build one of the world's largest and most successful building empires - Hyundai - through a combination of creative thinking, tenacity, timing, political skills, and a business strategy that few competitors ever understood. Chung entered the shipbuilding business with no experience and went on to create the world's largest shipyard. He began making automobiles when foreign experts unanimously predicted he would fail, and he started a global construction company that has built some of today's greatest architectural wonders. He even convinced the International Olympic Committee to select South Korea over Japan as the site for the highly successful 1988 Olympics. Unlike most CEO's of major firms, Chung has always preferred the company of his workers to that of the global executive elite. Hard work, creativity and a capacity to never give up - this is the essence of Chung's life. In each of his ventures, he exhibited a sheer determination to succeed, regardless of the obstacles, and he worked tirelessly to instil this drive in all of his employees. Even today, in the midst of Korea's worst economic crisis in over four decades, Chung's company is busy implementing plans to emerge as an even stronger contender in the world economy. Illustrated with 32 pages of colour photographs not previously seen in the West, including photos of Chung's recent historic visit to North Korea in 1998, Made in Korea takes stock of Chung's entire life, highlighting both his contributions to society and the lessons his work can teach to aspiring entrepreneurs.

System-on-Chip for Real-Time Applications will be of interest to engineers, both in industry and academia, working in the area of SoC VLSI design and application. It will also be useful to graduate and undergraduate students in electrical and computer engineering and computer science. A selected set of papers from the 2nd International Workshop on Real-Time Applications were used to form the basis of this book. It is organized into the following chapters: -Introduction; -Design Reuse; -Modeling; -Architecture; -Design Techniques; -Memory; -Circuits; -Low Power; -Interconnect and Technology; -MEMS. System-on-Chip for Real-Time Applications contains many signal processing applications and will be of particular interest to those working in that community.

This authoritative and sweeping compendium, the second volume in Getzel Cohen's organized survey of the Greek settlements founded or refounded in the Hellenistic period, provides historical narratives, detailed references, citations, and commentaries on all the settlements in Syria, The Red Sea Basin, and North Africa from 331 to 31 BCE. Organized geographically, the volume pulls together discoveries and debates from dozens of widely scattered archaeological and epigraphic projects. Cohen's magisterial breadth of focus enables him to provide more than a compilation of information; the volume also contributes to ongoing questions and will point the way toward new avenues of inquiry.

Braving poison ivy, recalcitrant livestock, briars, and other hazards while taking part in a contest of "Extreme Croquet," Meg Langlow stumbles upon the body of a dead woman, whose head has been bashed in by a croquet mallet, and launches a personal investigation into the crime. By the author of Owls Well That Ends Well. Reprint.

Health Economics and Financing serves as the perfect primer for the economic analysis of medical markets. It prepares students of medicine, public health, policy and administration who wish to engage the central economic issues of their field-without extensive mathematics or highly technical analytical techniques. Getzen's text includes effective explanations of how and why health and medicine are both like and unlike other economic goods, as well as knowledge about institutional features, for students who intend to go into this unique and rewarding line of work. Health Economics and Financing serves as an excellent primer for introducing students to the principles and core concepts of health economics rather than its literature, equations, or research methods.

Becoming a manager of a health care organization requires a broad understanding of the field. This includes a strong grasp of the economics involved in the daily operation of the organization. Providing an accessible introduction to important economic concepts in the field, this book will help readers gain the knowledge to run an organization. Getzen breaks down difficult topics while explaining the importance of economics in the function of the health care system.

From the first motor cars and classic cars to today's supercars and Formula 1, this is the ultimate book about the history of the car. Packed with stunning photography, and featuring more than 2,000 cars, Car shows you how cars have evolved around the world over the the last 130 years, and their impact on society as objects of curiosity, symbols of status and luxury, and items of necessity. Extensive catalogues showcase the most important marques and models, organized in categories such as sports cars, convertibles, and city compacts. The book also features virtual photographic tours of some of the most iconic cars from each era such as the Rolls Royce Silver Ghost, Ford Model T, Lamborghini Countach, and Ferrari F40, while cross-sections of key engines explore the driving force behind them. Lavishly illustrated feature spreads detail the stories of the men, machines, and magic that helped create the car world's most famous marques and made brands such as Porsche, Mercedes-Benz, Aston Martin, and Cadillac household names. If you love cars, then you'll love Car. It is simply a must-have title for all car enthusiasts.

Kidnapped into slavery in 1841, Northup spent 12 years in captivity. This autobiographical memoir represents an exceptionally detailed and accurate description of slave life and plantation society. 7 illustrations. Index.
