Talks Industrial Applications Of Marine Biopolymers

Industrial Applications of Marine Biopolymers presents different classes of marine biopolymers and their industrial applications, demonstrating the precious value of ocean resources to society. This timely volume discusses the exceedingly useful polymers derived from these materials that are biodegradable, biocompatible, and at times water soluble.

Industrial Applications of Marine Biopolymers | Taylor ...

Biopolymers are one of the main types of biomaterials family and they play an important role in human health. They are derived from natural sources and are mostly biodegradable; some are water soluble and not hazardous to the environment. Biopolymers are mostly produced by biological systems such as plants, animals, 230fungi, and microorganisms (Peralta et al. 2012), and are involved in plants, animals, and marines as natural building materials for their replication, transmission of foods ...

Industrial Applications of Marine Biopolymers: Sudha ...

Biopolymers represent a carbon emission solution: they are green and eco-friendly with a variety of uses in biomedical engineering, the automotive industry, the packaging and paper industries, and for the development of new building materials. This book describes the various raw materials of biopolymers and their chemical and physical properties, the polymerization process, and the chemical structure and properties of biopolymers.
