Bruno Zevi (1918-2000) è un punto di riferimento e di confronto per chiunque si occupi di architettura. Storico innovatore, critico raffinato, colto divulgatore, polemista acuto, Zevi ha riportato l'architettura e la sua storia al centro del dibattito culturale. Basata su un'indagine documentaria minuziosa, questa *Introduzione* è il primo studio sistematico che ne ricostruisce la biografia intellettuale, la presenza e il ruolo sulla scena nazionale e internazionale.

Il volume riunisce due iniziative sul rapporto tra l'architetto ferrarese Biagio Rossetti, di cui nel 2016 ricorreva il cinquecentenario della morte, e lo storico dell'architettura Bruno Zevi, che nel 2018 avrebbe compiuto cento anni: una mostra, ospitata nella sede della Fondazione Bruno Zevi a Roma, e un convegno, svoltosi nel salone d'onore di Palazzo Tassoni a Ferrara, riuniti sotto il comune denominatore Biagio Rossetti secondo Bruno Zevi. Se la mostra aggiorna e rivisita quella eretica del 1956 – Identità di Biagio Rossetti, tenutasi nel Ridotto del Teatro Comunale di Ferrara – curata da Zevi e allestita da Valeriano Pastor, il convegno riflette sul rapporto tra lo storico e la sua città di elezione. Entrambe le iniziative ci guidano a «saper vedere Biagio Rossetti» e la sua Ferrara Nova che, grazie a quel filtro critico, sarebbe diventata la sorprendente metafora della città storica a misura di una diversa e altrimenti possibile contemporaneità.

In his landmark volume *Space, Time and Architecture*, Sigfried Giedion paired images of two iconic spirals: Tallin's Monument to the Third International and Borromini's dome for Sant'Ivo alla Sapienza. The values shared between the baroque age and the modern were thus encapsulated on a single page spread. As Giedion put it, writing of Sant'Ivo, Borromini accomplished 'the movement of the whole pattern [...] from the ground to the lantern, without entirely ending even there.' And yet he merely 'groped' towards that which could 'be completely effected' in modern architecture-achieving 'the transition between inner and outer space.' The intellectual debt of modern architecture to modernist historians who were ostensibly preoccupied with the art and architecture of earlier epochs is now widely acknowledged. This volume extends this work by contributing to the dual projects of the intellectual history of modern architecture and the history of architectural historiography. It considers the varied ways that historians of art and architecture have historicized modern architecture through its interaction with the baroque: a term of contested historical and conceptual significance that has often seemed to shadow a greater contest over the historicity of modernism. Presenting research by an international community of scholars, this book explores through a series of cross sections the traffic of ideas between practice and history that has shaped modern architecture and the academic discipline of architectural history across the long twentieth century. The editors use the historiography of the baroque as a lens through which to follow the path of modern ideas that draw authority from history. In doing so, the volume defines a role for the baroque in the history of architectural historiography and in the history of modern architectural culture.

Architetto, urbanista, storico e critico di architettura, membro del movimento clandestino Giustizia e Libertà, del Partito d'Azione, di Unità popolare, infine del Partito radicale, docente universitario: la ricca biografia intellettuale e professionale di Bruno Zevi (1918-2000) si snoda lungo tutto il Novecento con un'impronta netta e originale, e un preciso punto di partenza, il 1938. A seguito delle leggi razziali, infatti, Zevi si trasferisce a Londra e, dal 1940, negli Stati Uniti, dove dirige i «Quaderni Italiani» – continuazione dei «Quaderni di Giustizia e Libertà» diretti a Parigi da Carlo Rosselli – e si laurea alla Harvard University. La sua attività prende dunque le mosse all'interno della comunità degli esuli italiani e delle organizzazioni antifasciste negli Usa, in stretta relazione con la diplomazia culturale americana. Con la fine della guerra e l'avvio dello scontro bipolare tra Stati Uniti e Unione Sovietica, l'Italia diviene infatti agli occhi del governo americano un alleato prezioso nella lotta al contenimento del comunismo europeo sia sul piano militare, sia nell'ambito della cultural diplomacy. Nuove domande storiografiche e recenti acquisizioni archivistiche ci consentono, attraverso le vicende di uno dei suoi protagonisti, di mettere in luce aspetti finora sconosciuti dell'emigrazione intellettuale italiana in Usa e dell'avvio della guerra fredda culturale.

This collection discusses the innovative and experimental architecture of Israel during its first three decades following the nation's establishment in 1948. Written by leading researchers, the volume highlights new perspectives on the topic, discussing the inception, modernization and habitation of historic and lesser-researched areas alike in its interrogation. Inbal Ben-Asher Gitler and Anat Geva show how Israeli nation building, in its cultural, political and historical contexts, constituted an exceptional experiment in modern architecture. Examples include modern experiments in mass housing design; public architecture such as exhibition spaces, youth villages and synagogues; a necessary consideration of climate in modern architectural experiments; and the exportation of Israeli modern architecture to other countries.

Following Italy's unification in 1861, architects, artists, politicians, and literati engaged in volatile debates over the pursuit of national and regional identity. Growing industrialization and urbanization across the country contrasted with the rediscovery of traditionally built forms and objects created by the agrarian peasantry. Pride in Modesty argues that these ordinary, often anonymous, everyday things inspired and transformed Italian art and architecture from the 1920s through the 1970s. Through in-depth examinations of texts, drawings, and buildings, Michelangelo Sabatino finds that the folk traditions of the pre-industrial countryside have provided formal, practical, and poetic inspiration directly affecting both design and construction practices over a period of sixty years and a number of different political regimes. This surprising continuity allows Sabatino to reject the division of Italian history into sharply delimited periods such as Fascist Interwar and Democratic Postwar and to instead emphasize the long, continuous process that transformed pastoral and urban ideals into a new, modernist Italy.

Italy and the UK experienced a radical re-organisation of urban space following the devastation of many towns and cities in the Second World War. The need to rebuild led to an intellectual and cultural exchange between a wave of talented architects, urbanists and architectural historians in the two countries. Post-war Architecture Between Italy and the UK studies this exchange, exploring how the connections and mutual influences contributed to the formation of a distinctive stance towards Internationalism, notwithstanding the countries' contrasting geographic and climatic conditions, levels of economic and industrial development, and social structures. Topics discussed in the volume include the influence of Italian historic town centres on British modernist and Brutalist architectural approaches to the design of housing and university campuses as public spaces; post-war planning concepts such as the precinct; the tensions between British critics and Italian architects that paved the way for British postmodernism; and the role of architectural education as a melting pot of mutual influence. It draws on a wealth of archival and original materials to present insights into the personal relationships, publications, exhibitions and events that provided the crucible for the dissemination of ideas and typologies across cultural borders. Offering new insights into the transnational aspects of European architectural history in the post-war years, and its legacy, this volume is vital reading for architectural and urban historians, planners and students, as well as social historians of the European post-war period.

Today, nearly a century after the National Fascist Party came to power in Italy, questions about the built legacy of the regime provoke polemics among architects and scholars. Mussolini's government constructed thousands of new buildings across the Italian Peninsula and islands and in colonial territories. From hospitals, post offices and stadia to housing, summer camps, Fascist Party Headquarters, ceremonial spaces, roads, railways and bridges, the physical traces of the regime have a presence in nearly every Italian town. The Routledge Companion to Italian Fascist Architecture investigates what has become of the architectural and urban projects of Italian fascism, how sites have been transformed or adapted and what constitutes the meaning of these buildings and cities today. The essays include a rich array of new arguments by both senior and early career scholars from Italy and beyond. They examine the reception of fascist architecture through studies of destruction and adaptation, debates over reuse, artistic interventions and even routine daily practices, which may slowly alter collective understandings of such places. Paolo Portoghesi sheds light on the subject from his internal perspective, while Harald Bodenschatz situates Italy among period totalitarian authorities and their symbols across Europe. Section editors frame, synthesize and moderate essays that explore fascism's afterlife; how the physical legacy of the regime has been altered and preserved and what it means now. This critical history of interpretations of fascist-era architecture and urban projects broadens our understanding of the relationships among politics, identity, memory and place. This companion will be of interest to students and scholars in a range of fields, including Italian history, architectural history, cultural studies, visual sociology, political science and art history.

Extensive work is a result of four year research within the international project Women's Creativity since the Modern Movement, and brings new insights into women in architecture, construction, design, urban planning and landscape architecture in Europe and in the rest of the world. It is divided into eight chapters that combine 116 articles on topics: A. Women's education and training: National and international mappings; B. Women's legacy and heritage: Protection, restoration and enhancement; C. Women in communication and professional networks; D. Women and cultural tourism; E. Women's achievements and professional attainments: Moving boundaries; F. Women and sustainability; City and Landscape; G. Women 'as subjects': Documentation, methodology, interpretation and enhancement; SG. Design drawings. / Obsežno delo je plod štiriletnih raziskav v okviru mednarodnega projekta MoMoWo - Zenska ustvarjalnost od modernizma dalje in prinaša nova spoznanja na področju žensk v arhitekturi, gradbeništvu, oblikovanju, urbanizmu in krajinski arhitekturi v Evropi in širše. Razdeljena je v osem poglavij, ki združujejo 116 prispevkov na temo o njihovi izobrazbenosti, kulturni zapuštni, vključevanju v stanovska združenja ali njihovim prispevkom h kulturnemu turizmu in stroki ter raziskovanju njihovega dela. Zaključijo poglavje z gmf/nim prilogami.

Goods made or designed in Italy enjoy a profile which far outstrips the country's modest manufacturing output. Italy's glorious design heritage and reputation for style and innovation has 'added value' to products made in Italy. Since 1945, Italian design has commanded an increasing amount of attention from design journalists, critics and consumers. But is Italian design a victim of its own celebrity? Made in Italy brings together leading design historians to explore this question, discussing both the history and significance of design from Italy and its international influence. Addressing a wide range of Italian design fields, including car design, graphic design, industrial and interior design and ceramics, well-known designers such as Alberto Rosselli and Ettore Sottsass, Jr. and iconic brands such as Olivetti, Vespa and Alessi, the book explores the historical, cultural and social influences that shaped Italian design, and how these iconic designs have contributed to the modern canon of Italian-inspired goods.
