As we begin the twenty-first century, UK employees work the longest hours in Europe. Workplace stress and home responsibilities are among the top five causes of absence from work. Yet work-life balance has emerged as a key concern for employers, policy makers and the media. This edited volume contains findings from 14 research projects within the ESRC's Future of Work Programme. The research examines the notion of employment flexibility and the effects of gender and care responsibilities on work and work performance. Conflicting needs of employers and employees and the gender divisions in work and family life call into question the feasibility of achieving the Government's aim of work-life balance for everyone.

Jones and George are dedicated to the challenge of "Making It Real" for students. As a team, they are uniquely qualified to write about the organizational challenges facing today's managers. No other author team in the management discipline matches their combined research and text-writing experience. *Essentials of Management* concisely surveys current management theories and research. Through a variety of real world examples from small, medium, and large companies the reader learns how those ideas are used by practicing managers. The organization of this text follows the mainstream functional approach of planning, organizing, leading, and controlling; but the content is flexible and encourages instructors to use the organization they are most comfortable with. The themes of diversity, ethics, and information technology are clearly evident through in-text examples, photographs, "unboxed" stories, and the end-of-chapter material - all areas of importance that truly serve to bring to life the workplace realities that today's student will encounter in the course of a career.
