How Bomber Command Helped Win. The Battle Of Britain. The RAF's victory over the Luftwaffe during the Battle of Britain in the summer of 1940 made a German invasion of Britain all but impossible. In his book Bomber Offensive, published in 1947, Marshal of the Royal Air Force Sir Arthur Harris wrote that all the credit for preventing the invasion of Britain had been given to Fighter Command.

From July 1940 to the end of the year, Bomber Command lost nearly 330 aircraft and over 1,400 aircrew killed, missing or captured. Bomber Command was also indirectly responsible, in part at least, for the switch of Luftwaffe attention away from Fighter Command to bombing civilian targets. A German bomber on a raid got lost due to poor navigation and bombed London.

RAF Bomber Command - Wikipedia

The major offensive by Great Britain against Germany during World War II was Bomber Command attacks at night. This attack was a failure. The RAF killed a lot of civilians but lost an unacceptable number of aircrew during this campaign. This book gives a daily listing of every sortie Bomber Command made during the war.

From 1942, Bomber Command seriously damaged the Third Reich's war economy by attacking industrial, communications and fuel targets in occupied Europe and Germany. Although the strategic bombing campaign undoubtedly shortened the war, it remains controversial because it resulted in the

The final, climactic volume of Wilson's acclaimed bomber war trilogy. In February 1945, British and American bombers rained down thousands of tons of incendiaries on the city of Dresden, creating one of the greatest firestorms in history. Their bombs killed an estimated 25,000 people, and wiped one of the most beautiful cities in Europe from the map. The controversy that erupted shortly afterwards, and which continues to this day, has long overshadowed the other events of the bomber war, and blighted the memory of the young men who gave their lives to fight in the skies over Germany. This book neither condemns the bombing of Dresden, nor excuses it, but simply puts it in its proper context as a devastating set of raids in a much larger campaign. To the crews who flew over Germany night after night there were other much more pressing worries: the V2 rockets that threatened their loved ones at

home, the brand new German jet fighters that could strike them at speeds of over 600mph, the deadly flak over the cities of the Ruhr Valley. The bomber war had entered its final unforgiving months, and no quarter was given on either side. Kevin Wilson has interviewed over a hundred people for this book, some of whom flew on the Dresden raids, and many more who experienced other aspects of bombing, both in the air and on the ground. JOURNEY'S END chronicles the brutal endgame of a conflict that caused devastation and tragedy on both sides.

Since the Second World War, depictions of Royal Air Force operations in film and television drama have become so numerous that they make up a genre worthy of scholarly attention. In this illuminating study, S. P. MacKenzie explores the different ways in which the men of RAF Bomber Command have been represented in dramatic form on the big and small screen from the war years to the present day. Bomber Boys on Screen is the first in-depth study of how and why the screen-drama image of those who flew, those who directed them, and those who provided support for RAF bomber operations has changed over time, sometimes in contested circumstances. Until now dramas that focus on Bomber Command have tended to be mentioned only in passing or studied in isolation, despite the prevalence of surveys of both the British war film genre and of aviation cinema. In Bomber Boys on Screen MacKenzie examines the development, presentation, and reception of significant dramas on a decade-by-decade basis. Titles from the beginning of the war (*The Lion Has Wings*, 1939) to the start of new century (*Bomber's Moon*, 2014) are situated in the context of technical possibilities and limitations, evolving social and cultural norms in the United Kingdom and elsewhere, and the development of moral and utilitarian controversies surrounding the wartime bomber offensive directed against Nazi Germany. While the focus is on feature films and television plays, reference is also made to documentaries, memorials, veterans' organizations,

book titles, war comics, and other representations of the war fought by Bomber Command.

Sometimes tragedies that have little to distinguish them from a wide range of similar events and which can make no claim to record numbers of casualties or destructive impact go down in history as fundamental and emblematic. This is the case of two of the airstrikes discussed in this volume: Barcelona and Dresden. Other tragedies, however, are sometimes obscured by circumstances elsewhere. This is the case of the "other Guernicas": that is to say, the bombings of Otxandio, Durango and Elorrio in Biscay. They are good examples not only of the brutality inherent in all wars and of how methods of combat become increasingly barbaric as conflicts wear on but also of the way in which some circumstances push events to the forefront of history and make them emblematic.

A historical analysis of the contribution of Great Britain's public schools to the conduct of World War II. Following their ground-breaking book on Public Schools and the Great War, David Walsh and Anthony Seldon now examine how those same schools fared in the Second World War. They use eye-witness testimony to recount stories of resilience and improvisation in 1940 as the likelihood of invasion and the terrors of the Blitz threatened the very survival of public schools. They also assess the giant impact that public school alumni contributed to every aspect of the war effort. The authors examine how the "People's War" brought social cohesion, with the opportunity to end public school exclusiveness to the fore, encouraged by Winston Churchill among others. That opportunity was ironically squandered by the otherwise radical Clement Attlee's post-war Labour government, prolonging the "public school problem" right through to the present day. The public schools shaped twentieth century history profoundly, never more so than in the conduct of both its world wars. The impact of the schools on both

wars was very different, as were the legacies. Drawing widely on primary source material and personal accounts of inspiring courage and endurance, this book is full of profound historical reflection and is essential reading for all who want to understand the history of modern Britain.

Documents the story of a small group of scientists who applied intellectual strategies to battle techniques and revolutionized the process of waging wars, citing the contributions of future Nobel winner Patrick Blackett.

Throughout late-1943 into early-1944, an epic struggle raged over the skies of Germany between RAF Bomber Command and the Luftwaffe. This campaign had been undertaken by the Commander-in-Chief Bomber Command, Air Chief Marshal Sir Arthur Harris, and was baptized 'The Battle of Berlin'. The Berlin campaign was a hard, desperate slog. Struggling against dreadful and bitter winter weather, Bomber Command 'went' to Berlin a total of sixteen times, suffering increasingly severe losses throughout the winter of 1943/44 in the face of a revitalized German air-defence. The campaign remains controversial and the jury, even today, is ultimately undecided as to what it realistically achieved. Illustrated throughout with full-colour artwork depicting the enormous scale of the campaign, this is the story of the RAF's much debated attempt to win the war through bombing alone.

During the immediate period before World War Two, the RAF modified its command structure to rationalize for rapid expansion. Bomber Command was divided into six operational groups, each flying

the same type of aircraft.3 Group had almost completely re-equipped with the Wellington by 4 September 1939 to carry out the second bombing operation of the war which was against German warships off Brunsbttel. In 1940 the first of the new four-engined bombers, the Short Stirling, came into service with the Group, being followed in 1942 by the Avro Lancaster. On 3rd/4th November 1943, No. 3 Group played a leading part in the first bombing attack in which heavy bombers made use of the radar bombing aid known as G-H. The target was Dsseldorf; bombs were dropped "blind" and good results were obtained. In July and August 1944, aircraft of this Group equipped with G-H maintained an all-weather attack against flying-bomb sites. Through the D-Day build-up, the liberation of France and conquest of Germany, formations of No. 3 Group attacked railway junctions, marshalling yards, troop concentrations, etc. During the week ending 25th March 1945, Bomber Command made numerous attacks to prepare for the crossing of the Rhine.

The cinema was the most popular form of entertainment during the Second World War. Film was a critically important medium for influencing opinion. Films, such as *In Which We Serve* and *One of Our Aircraft is Missing*, shaped the British people's perceptions of the conflict. *British War Films, 1939-1945* is an account of the feature films produced during the war, rather than government documentaries and official propaganda, making the book an important index of British morale and values at a time of desperate national crisis.

The Battle of Berlin, the bombing of the "Big City" as it was known to the crews of RAF Bomber Command, raged from 18 November 1943 to the end of the war in Europe in 1945. It is recalled here both by those in the air over capital of the Third Reich, as well as those who suffered under the bombing

onslaught. At the start of the Battle of Berlin, Sir Arthur Harris had predicted that the "Big City" would "cost between 400-500 aircraft", but that it would also "cost Germany the war". He was proved wrong on both counts. Berlin was not "wrecked from end to end", as Harris predicted on 3 November 1943 "if the USAAF will come in on it" although a considerable part of it was destroyed. And the "Main Battle of Berlin" did not cost Germany the war; a grinding land campaign had yet to be fought. More than 9,000 bombing sorties were flown during the battle on round trips of about 1,200 miles to Berlin and back. Berlin was bombed by four Allied air forces between 1940 and 1945. British bombers alone dropped 45,517 tons of bombs, whilst the Americans a further 23,000 tons. By 1944, some 1.2 million people, 790,000 of them women and children, about a quarter of Berlin's population, had been evacuated to rural areas. An effort was made to evacuate all children from Berlin, but this was defeated by parents and many evacuees who soon made their way back to the city. However, by May 1945, 1.7 million people "40% of the population" had fled the city. This fitting tribute to those who died in the relentless struggle to knock Berlin, and hopefully Germany, out of the war resonates with eyewitness accounts and background information which the author has painstakingly investigated and researched. The result is a hugely fascinating and highly readable narrative containing very real and unique observations by British and Commonwealth aircrew and, equally importantly, the long-suffering citizens of Berlin, and well as the capital's defenders. Up to the end of March 1945, there had been a total of 314 air raids on Berlin, eighty-five of these in the last twelve months. Estimates of the total number of dead in Berlin from air raids range from 20,000 to 50,000; the relatively low casualty figure in Berlin is partly the result of the city's formidable air defenses and shelters. The Battle of Berlin was not a defeat in absolute terms, but in the operational sense it was an offensive that Air Marshal Sir Arthur Harris and his aircrews could not win. "Berlin won" concluded Sir Ralph Cochrane, the Air Officer Commanding 5 Group RAF Bomber

Command. "It was just too tough a nut."
