Your physiotherapist will carry out a thorough assessment to find out what component (s) of your knee is the primary cause of your problem. PRICE guidelines (Protection, Rest, ICE) may be utilised initially and this might be in the form of crutches, a knee support or the use of ice therapy.

Treatment for knee pain | The Chartered Society of ...

Over-the-counter medications — such as ibuprofen (Advil, Motrin IB, others) and naproxen sodium (Aleve) — may help ease knee pain. Some people find relief by rubbing the affected knee with creams containing a numbing agent, such as lidocaine, or capsaicin, the substance that makes chili peppers hot. Self-care measures for an injured knee include:

When there is no flare-up, the knee can be pain free. With septic arthritis (infectious arthritis), the knee joint can become infected; this leads to pain, swelling, and fever. This condition requires antibiotics and drainage treatments as soon as possible.

Knee Pain Treatment, Diagnosis & Related Symptoms
Knee joint pain treatment aims to reduce pain, instability, swelling and weakness. Some treatments work well in the initial stages after a knee injury whereas some are more appropriate for longer term conditions. To be effective, knee pain treatment should look to cure not just the symptoms of the problem but also what is causing it in the first place, otherwise the problem may well return in ...
