An American diplomat is forced to confront the devastation of her past when she is assigned to remote northern Afghanistan. Twenty-one years ago, diplomat Angela Morgan witnessed the death of her husband during the bombing of the U.S. Embassy in Beirut. Devastated by her loss, she fled back to America, where she hid in the backwaters of the State Department and avoided the high-profile postings that would advance her career. Now, with that career about to dead-end and no true connections at home, she must take the one assignment available-at a remote British army outpost in northern Afghanistan. Unwelcome among the soldiers and unaccepted by the local government and warlords, Angela has to fight to earn the respect of her colleagues, especially the enigmatic Mark Davies, a British major who is by turns her staunchest ally and her fiercest critic. Frustrated at her inability to contribute to the nation's reconstruction, Angela slips out of camp disguised in a burka to provide aid to the refugees in the war-torn region. She becomes their farishta, or "angel," in the local Dari language-and discovers a new purpose for her life, a way to finally put her grief behind her. Drawing on the experiences of the author as a diplomat in Afghanistan, Farishta is a deeply moving and fast-paced story of a woman struggling to move beyond a past trauma, and finding a new community, a new love, and a new sense of self in the process.

Cooking when time is short can be a real challenge, but with '30-Minute Indian' you can bring the flavours and aromas of India to your table in 30 minutes or less! In this collection of over 90 exciting recipes Sunil Vijayakar covers everything from salads and side dishes to main meals, desserts and drinks. Choose from a mouthwatering selection of rich and fragrant yet simple dishes including Spiced Spinach and Carrot Pancakes, Prawn and Mango Kebabs and Bombay Chicken Masala, and with tips and suggestions throughout the book delicious Indian food is guaranteed!

Practical Astronomy with your Calculator, first published in 1979, has enjoyed immense success. The author's clear and easy to follow routines enable you to solve a variety of practical and recreational problems in astronomy using a scientific calculator. Mathematical complexity is kept firmly in the background, leaving just the elements necessary for swiftly making calculations. The major topics are: time, coordinate systems, the Sun, the planetary system, binary stars, the Moon, and eclipses. In the third edition there are entirely new sections on generalised coordinate transformations, nutation, aberration, and selenographic coordinates. The calculations for sunrise and moonrise are improved. A larger page size has increased the clarity of the presentation. This handbook is essential for anyone who needs to make astronomical calculations. It will be enjoyed by amateur astronomers and appreciated by students studying introductory astronomy. • Clear presentation • Reliable approximations • Covers orbits, transformations, and general celestial phenomena • Can be used anywhere, worldwide • Routines extensively tested by thousands of readers round the world

Beth and her cousin Patrick travel in Mr. Whittaker's invention, the Imagination station, to 1000 A.D. Greenland, where they meet Erik the Red and Leif Eriksson and witness the spread of Christianity in that country.

History of calendars. The Millennium - do we have the correct date? Why do we celebrate Easter Sunday when we do? Find out in this book.

Winner of the 2015 Choice Outstanding Academic Title Award This volume offers the first set of essays on slave trading in the South Atlantic. These studies show that the Angola-Brazil complex was not the single commercial axis in this region and that Portuguese-Brazilian merchants were not alone in this business.

Can purity survive real-world temptation? "True love waits"--but what exactly are you waiting for? After all, we're constantly bombarded with Hollywood's idea of romance--that sex is no big deal, that everyone is doing it, that it's the only path to a happy ending. Maybe you've even begun to wonder, What am I missing? Is the wait really worth it? Marian Jordan Ellis has been there. She knows the pitfalls of giving in to temptation--but also the blessings of God's best found in waiting after she committed herself to Christ and to sexual purity. Now, from one Christian woman to another, she hopes

to spare you from the heartache of sexual sin and instead point you toward God's best. Marian offers lots of practical advice, backed by biblical truth, to equip you with the tools to overcome past mistakes and future temptations. You are cherished. Whether you are happily single, casually dating, or have found "the one," your purity is worth fighting for.

Science Essentials High School Level gives classroom teachers and science specialists a dynamic and progressive way to meet curriculum standards and competencies. Science Essentials are also available from Jossey-Bass publishers at the Elementary School and Middle School Levels. You'll find the lessons and activities at each level actively engage students in learning about the natural and technological world in which we live by encouraging them to use their senses and intuitive abilities on the road to discovery. They were developed and tested by professional science teachers who sought to give students enjoyable learning experiences while preparing them for district and statewide proficiency exams. For easy use, the lesson and activities at the High School Level are printed on a big 8 ½" x 11" lay-flat format that folds flat for photocopying of over 107 student activity sheets, and are organized into two sections: BIOLOGY (60 Lessons) CHEMISTRY (47 Lessons)

The essays in this book provide statistical analysis of the transatlantic slave trade, focusing especially on Brazil and Portugal from the 17th through the 19th century. The book contains research on slave ship voyages, origins, destinations numbers of slaves per port country, year, and period.
