This book offer clear descriptions of the basic structure for the recognition and classification of human activities using different types of sensor module and smart devices in e.g. healthcare, education, monitoring the elderly, daily human behavior, and fitness monitoring. In addition, the complexities, challenges, and design issues involved in data collection, processing, and other fundamental stages along with datasets, methods, etc., are discussed in detail. The book offers a valuable resource for readers in the fields of pattern recognition, human-computer interaction, and the Internet of Things.

A truly fulfilling marriage involves two people focusing on each others' needs rather than their own. Lysa TerKeurst, president of The Proverbs 31 Ministry, has written a practical guide for each spouse that will open their eyes to the needs, desires, and longings of the other. She offers eight essential criteria for capturing the heart of

your spouse, with creative tips on how to accomplish them. Having a great marriage takes time, creativity, and willingness. Capture His Heart and Capture Her Heart are excellent tools to help spouses run this very worthwhile race. Husbands Need Their Wives To: 1. Support Them Spiritually 2. Encourage Them Emotionally 3. Enjoy Them Sexually 4. Appreciate Them Vocationally 5. Engage Them Intellectually 6. Connect with Them Relationally 7. Affirm Them Physically 8. Stand by Them Permanently

This book constitutes the refereed proceedings of the 13th International Conference on Brain Informatics, BI 2020, held in Padua, Italy, in September 2020. The conference was held virtually due to the COVID-19 pandemic. The 33 full papers were carefully reviewed and selected from 57 submissions. The papers are organized in the following topical sections: cognitive and computational foundations of brain science; investigations of human information processing systems; brain big data analytics, curation and management; informatics paradigms for brain and mental health research; and brain-machine intelligence and brain-inspired computing.

This book provides a comprehensive overview of the current state of the art of practical applications of neuroprosthesis based on

functional electrical stimulation for restoration of motor functions lost by spinal cord injury and discusses the use of brain-computer interfaces for their control. The book covers numerous topics starting with basics about spinal cord injury, electrical stimulation, electrical brain signals and brain-computer interfaces. It continues with an overview of neuroprosthetic solutions for different purposes and non-invasive and invasive brain-computer interface implementations and presents clinical use cases and practical applications of BCIs. Finally, the authors give an outlook on cutting edge research with a high potential for clinical translation in the near future. All authors committed themselves to use easy-to-understand language and to avoid very specific information, focusing instead on the essential aspects. This makes this book an ideal choice not only for researchers and clinicians at all stages of their education interested in the topic of brain-computer interface-controlled neuroprostheses, but also for end users and their caregivers who want to inform themselves about the current technological possibilities to improve paralyzed motor functions.

#1 NEW YORK TIMES bestselling author Grant Blackwood introduces Briggs Tanner in a trilogy that Clive Cussler raves is "Pure fun, pure adventure." One Man. Covert agent Briggs Tanner doesn't like

coincidences. In his business, they always mean trouble. So when a man is professionally assassinated right in front of him, Tanner wants answers. One Mission. Who pulled the trigger and why? And what is the mystery behind the key the man clutched in his dying hand—the key that Tanner now possesses? One War Without End. His search will lead him on an international trail, city to city, from the depths of the Pacific Ocean to the bullet-ridden back alleys of Beirut, all the way to a deadly secret—buried since the end of World War II—that only Tanner can keep from falling into the wrong hands.

This book takes a case-based approach to addressing the challenges psychiatrists and other clinicians face when working with American combat veterans after their return from a war zone. Written by experts, the book concentrates on a wide variety of concerns associated with posttraumatic stress disorder (PTSD), including different treatments of PTSD. The text also looks at PTSD comorbidities, such as depression and traumatic brain injury (TBI) and other conditions masquerading as PTSD. Finally, the authors touch on other subjects concerning returning veterans, including pain, disability, facing the end of a career, sleep problems, suicidal thoughts, violence, and mefloquine “toxicity”. Each case study includes a case presentation, diagnosis and assessment, treatment and
