### Lotus Esprit: The Official Story

Manufacturing and Design presents a fresh view on the world of industrial production: thinking in terms of both abstraction levels and trade-offs. The book invites its readers to distinguish between what is possible in principle for a certain process (as determined by physical law); what is possible in practice (the production method as determined by industrial state-of-the-art); and what is possible for a certain supplier (as determined by its production equipment). Specific processes considered here include metal forging, extrusion, and casting; plastic injection molding and thermoforming; additive manufacturing; joining; recycling; and more. By tackling the field of manufacturing processes from this new angle, this book makes the most out of a reader's limited time. It gives the knowledge needed to not only create well-producible designs, but also to understand supplier needs in order to find the optimal compromise. Apart from improving design for production, this publication raises the standards of thinking about producibility. Emphasizes the strong link between product design and choice of manufacturing process Introduces the concept of a "production triangle" to highlight tradeoffs between function, cost, and quality for different manufacturing methods Balanced sets of questions are included to stimulate the reader's thoughts Each chapter ends information on the production methods commonly associated with the principle discussed, as well as pointers for further reading Hints to chapter exercises and an appendix on long exercises with worked solutions available on the book's companion site: <http://booksite.elsevier.com/9780080999227/>

### Lotus Esprit: The Official Story

Lotus Esprit: The Official Story is the inside story of Britain's best loved supercar from it's development in the early 1970's right through to the 21st century. That the Esprit ever appeared in the showroom, never mind set a record for British sportscar continuous production from 1976-2004, is a story straight from the Lotus era. How Colin Chapman labored alongside Italian designer and fellow genius Giorgetto 'Giorgio' Giugiaro to bring the first show Esprits to life, is just one of the stories unveiled by Jeremy Walton's research. The Esprit, in all its Lotus Type numbers and derivatives from the very first Type 79 onwards, is revealed in this seriously comprehensive book. A total of under 11,000 Esprits were made in it's 28 year production span, which means that some models had production numbers of less than 100 and have therefore become extremely collectable. Supremely agile and rapid Esprits such as the Sport 300 and V8 350 are examined in all their 160 to 175 mph glories - along with the race track inspired Esprit Turbo SCCA, X180R and Type 114 Esprit GT1. As with Walton's acclaimed Lotus Elise title for Coterie, this conscientious Esprit production was enabled only by the full co-operation of Lotus Cars. Once again they gave frank access to their archives as well as their employees. Lotus Esprit The Official Story contains the reminiscences of the loyalists and the youngsters who added to their growing reputations when involved in the concept and design of the Esprit, many who are now famous industry figures following a Lotus apprenticeship. The author's trusted participation at every stage in the Esprit's long life is reflected by the openness of all involved. They tell us the real stories behind the car, leaving us with hope of an innovative new Esprit before too long.
