MACD divergence seems like a good tool for spotting reversals. It is inaccurate, untimely

information produces many false signals and fails to signal many actual reversals. Traders are better off focusing on the price action, instead of divergence. For a downtrend to reverse, the price must make a higher swing high and/or a higher swing low.

Trading. The divergence is one of the most popular strategies of MACD trading. However, it's also the least successful; especially when done without the help of other technical indicators and patterns. MACD divergence is when the price of a stock moves away from the MACD. It signals the end of a price movement or trend.
