Fundamentals of Management, 4/e, an abridged version of Management, 8/e, provides up-to-date coverage to key functional areas (planning, organizing, leading, and controlling) plus new research and examples, all in a brief format. From respected author Ricky Griffin, this skills-based text gives instructors the flexibility to integrate their own cases, exercises, and projects while continuing to provide them with a strong theoretical framework. New! Each chapter also contains either a Technology Toolkit, Business of Ethics, or Today's Management Issues boxed feature. These are intended to briefly depart from the flow of the chapter to highlight or extend especially interesting or emerging points and issues relating to new technology and its role in management or ethical issues and questions facing managers today. New! Test Preppers, located at the end of every chapter, prompt students with true/false and multiple-choice quizzes to gauge their retention and comprehension of chapter material. The answers are found at the end of the text. New! HM e-Study Student CD-ROM is carefully tailored to supplement and enhance the content of the text, including ACE self-tests, selected videos, chapter outlines, company web links, a glossary, flashcards, learning objectives, ready notes, self-assessment exercises, and chapter summaries. The CD-ROM is free with the text. Knowledgebank Icon in the text refers students to the new Knowledgebank feature on the HM e-Study CD. Here they can find additional information about particular topics in the text. It can also be used to find further management knowledge or for a research project, and it can be found only on HM e-Study CD ROM. Building Management Skills exercises appear throughout the text and are organized around the set of basic management skills introduced in Chapter 1. The Skills Self-Assessment Instrument helps readers learn something about their own approach to management. Finally, an Experiential Exercise provides additional action-oriented learning opportunities, usually for group settings. Pedagogical features that support learning are features throughout the text. In addition to the end-of-the-chapter exercises, every chapter includes important learning objectives, a chapter outline, an opening incident, boldface key terms, a summary of key points, questions for review, questions for analysis, and an end-of-the-chapter case with questions. Eduspace, a flexible, powerful, and customizable e-learning platform, provides instructors with text-specific online courses and content for Management, 4/e, Eduspace permits the instructor to create part or all of their course online using the widely recognized tools of Blackboard and quality text-specific content of Houghton Mifflin (HMCo). Instructors can quickly and easily assign homework exercises, quizzes and tests, tutorials and supplementary study materials. Pre-loaded material can be modified, or instructors can add their own.

Stop! If you have been looking for the one resource for managing a business of any size, this is it. Based on the extensive business experience of five experts, this authoritative guide provides an in-depth look at what every leader must know about managing across departments, functions, divisions, or companies. Drawing on decades of combined experience, John Colley and colleagues detail the wide range of skills, tools, and conceptual understanding as well as the qualities of leadership that a successful general manager must acquire. In an era of specialization and specialists, the authors return due focus to the generalist. No other book so passionately and thoroughly examines the roles and responsibilities of the general manager and the full scope of this distinct, pressure-filled occupation. The authors explore the quantitative and qualitative aspects of the job and discuss how the skilled manager moves an organization from abstract goals to definitive action. For every profit center or plant manager, function head, division president, or CEO, this book is indispensable reading.

Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

Whether a sunbathing beach in the Mediterranean, a surf beach in Australia, a conservation area in the UK or a wild section of wind and wave swept dunes on the Oregon coast, beaches are one of the most widely loved and heavily used and abused areas in the world. Competing social or recreational, economic and conservation uses and the needs of many users make beach management particularly challenging but vitally important. This comprehensive book provides full coverage of beach management principles and practice, with an emphasis on needs-based management. The book comprises two sections. Part one covers beach management principles and theory and addresses practical management tools and guidelines including how to determine the best management strategy for different beach types (linear, pocket, resort, urban, village, rural and remote) as well as how to include user preferences and priorities in effective management plans. The second section provides a wealth of case studies of best and worst practice authored by a cast of international beach management experts from the UK, USA, New Zealand, the Mediterranean, and Latin America. The emphasis throughout the book is on optimizing economic, social and environmental outcomes and reconciling competing needs in management planning for beach area. This book is an indispensable tool kit for all professionals in beach and coastal/beach zone management including local and regional authorities, planners, park and protected area managers, societies, resort and beach owners and managers. It is also a comprehensive primer for university undergraduate students in professional planning, land, coastal zone and beach management, coastal geography as well as tourism and conservation planning and management.
