This was a core text for many British A-Level Mathematics students. It is a well written and easy to follow text book. The major flaw in an otherwise super text is that it has several typos and the occasional incorrect answer to self-test questions. These errors can hinder a student's understanding of a concept.

B.S. Mathematics (Mathematics Education emphasis) This emphasis is for students preparing to teach mathematics at the secondary school level. The Education emphasis has two main components, a set of courses in mathematics, and a set of pedagogy courses. This emphasis does not require a minor.

Written for the Edexcel Syllabus B and similar schemes offered by the Awarding Bodies, this book incorporates modern approaches to mathematical understanding. It provides worked examples and exercises to support the text.

Course 1 includes a combination of rational numbers, patterns, geometry and integers in preparation for one- and two-step equations and inequalities. Guided Problem Solving strategies throughout the text provide students with the tools they need to be effective and independent learners. An emphasis on fractions solidifies student understanding of rational number operations in preparation for applying these skills to algebraic equations. Activity Labs throughout the text provide hands-on, minds-on experiences to reach all types of learners.
