The ultimate aim of any teaching system is to produce the best scholars & the best professionals in the today's scenario with futuristic approach so that when given a chance they must be able to exhibit their past knowledge. To verify or quantify this knowledge the student/scholar has to undergo certain exam. Nowadays the best exams are supposed to be those having Multiple Choice Questions i.e. MCQ's as integral part because of two important reasons, First easy to conduct & uniform evaluation for all students, that is no bias, Second MCQ's checks memory/recall memory/ reasoning & ability to be precise in terms of reading /understanding and speed with ability to record answers with accuracy too. The book on this subject □Exam Success Review ANATOMY MCQ's- Volume-3, Abdomen & Lowerlimb for Medical Students □ MBBS 1st Prof & PG Entrance□ will be helpful as a companion for fast revision during examination and will help them certainly to secure full marks in the Multiple Choice Questions in examination. I must let you know that MCQ's make about 20% to 40% of total marks in the 1st prof. MBBS exam and anybody who knows the con-cepts and art to answer the MCQ's is going to be winner not only at MBBS level but also at various Postgraduate entrance Examinations at national & state level to get the PG Course of their choices.

Anatomy: 1800 Multiple Choice Questions contains 1,800 multiple choice questions related to anatomy. The questions are supported by illustrations and arranged into nine sections: Upper Limb, Lower Limb, Thorax, Abdomen, Pelvis and Perineum, Head and Neck, Nervous System, Histology, and Embryology. In the Histology section, the questions in each of the six standard formats are arranged in the same sequence, as follows: the Cell; the Tissues (commencing with the Epithelia and ending with Nervous Tissue); and the Systems (commencing with the Cardiovascular and ending with the Reproductive). Readers will encounter questions dealing with the spine of the scapula, the vein that pierces the clavipectoral fascia, branch of the axillary artery, and the quadriceps femoris muscle. Other topics include muscle pair inserted into iliotibial tract, bony prominences on which you kneel, muscle that flexes hip and knee, and the chromosomal formula of the oocyte at ovulation. This text also discusses the rate of regeneration of peripheral nerves following injury; structures that occupy the carotid sheath; and the location of sphincter urethrae. This book will be extremely valuable to students and teachers of anatomy.

Online Library Mcq On Anatomy Lower Limb With Answers

Multiple Choice Questions in Anatomy and Neurobiology for Undergraduates is a collection of multiple choice questions in anatomy and neurobiology for undergraduate students. Questions are grouped for each visceral system and the nervous system. In the case of the body framework (including peripheral nerves and blood vessels), however, a regional grouping is used. Each question has the corresponding correct answer. This book is comprised of eight chapters covering the upper limb, head and neck, musculoskeletal trunk, lower limb, cardiovascular and respiratory systems, gastrointestinal and genito-urinary systems, and neurobiology. Each chapter contains three types of questions designed to test knowledge in different ways. Type A items involve choosing a single correct answer from five available choices. Type L items are used to elicit information on the cause-effect relationship between sets of data. Type E items call for the perception of one or more correct responses among four alternatives, and the responses may be grouped in five different ways. Most questions are also accompanied by an indication of the percentage of students who obtained the correct answer on occasions of previous settings and by a biserial correlation coefficient (r biserial), indicative of the capacity of the question to distinguish between more able and less able students. This monograph is primarily intended for medical undergraduates and will also be useful to academic anatomists building up their own question banks.

This book Dr. Singh's NEET PG MCQ's for Medical Students Anatomy Question Bank is being crafted based on the latest syllabus and guidelines of NEET PG. Anatomy MCQ's are based on Gray's Anatomy for the authenticity and accuracy is complete book and probably largest and latest question bank available today.
