The more dots, the sharper and clearer the image. At the very least, you should buy a monitor with a Full HD (1,920 x 1,080, otherwise known as 1080p) resolution. Anything less than this (usually 1,600 x 900 or ‘HD’ 1,366 x 768) not only means your picture won’t be as clear, but also suggests you will be buying a very low-quality panel.

Refresh rate is the number of times per second the monitor refreshes its image. Refresh rate is measured in hertz, the higher the number the more times per second the monitor refreshes. A higher refresh rate will improve motion resolution which means moving images will appear sharper. 60Hz is the minimum for a good quality monitor experience.
