Motivational Interviewing in Nutrition and Fitness ---

Supporting behaviour change is a crucial part of nutritional interventions. Motivational interviewing (MI) is one of the most evidence-based approaches that is used to encourage long-term behaviour change 1-2. MI is described as: "a collaborative, person-centered form of guiding to elicit and strengthen motivation for change" 3.

Motivational Interviewing in Nutrition and Fitness ---

As nutrition and fitness professionals, we no longer provide clients with food lists, meal plans and exercise prescriptions and send them on their way. Within the health field, simply giving advice has been replaced with motivational interviewing (MI), a compassionate, non-judgmental communication style.... (read more)

Motivational Interviewing in Nutrition and Fitness **+15 CPEU**

Motivational Interviewing for Diet, Exercise and Weight Motivational interviewing aims to enhance self-efficacy and personal control for behavior change. It uses an interactive, empathic listening style to increase motivation and confidence by specifically emphasizing the discrepancy between personal goals and current health behaviors. 1

Motivational Interviewing for Diet, Exercise and Weight

An alternative to this top-down approach is motivational interviewing (MI), a style of talking with clients in a constructive manner about health-risk reduction and behavior change.1 Based on the idea that most individuals already have the requisite skills to successfully modify lifestyle and decrease health risk, MI employs strategies that will enhance the client's own motivation for and commitment to change.
