institutional reflection on UN peace operations. It provides constructive suggestions as to how the UN and the international system can evolve to remain relevant and tackle the peace and security challenges of the 21st century, without abandoning the principles that the UN was founded upon and on which the legitimacy of UN peace operations rests. The author analyses the evolving politics on UN peace operations of the five veto powers of the UN Security Council, as well as major troop-contributing countries and western powers. He investigates the move towards peace

International and counter-terrorism, and what consequences this development may have for the UN. Karlsrud issues a challenge to practitioners and politicians to make sure that the calls for reform are anchored in a desire to improve the lives of people suffering in conflicts on the ground—and not spurred by intra-organizational turf battles or solely the narrow self-interests of member states. Finally, he asks how the UN can adapt its practices to become more field- and people-centered, in line with its core, primary commitments of protecting and serving people in need.

This book focuses on the prospects now opening up for Franco-British co-operation in the fields of defence and security. Looking at the situation from the viewpoints of both Britain and France, it builds on the indications of a developing awareness within the two governments of the benefits to be derived from a closer partnership. The book argues forcefully that it is now time for both Britain and France to give up their long-standing attitude of mutual indifference or even rivalry, and to recognise openly the similarities and natural affinities that

exist between them. Although the ways in which defence problems are discussed in the two countries do not always coincide, the solutions proposed are often alike: in other words, Paris and London have much more in common in their approaches to defence and security questions than is generally recognised. The solutions put forward are intended not only to increase co-operation between France and Britain, but also to lead to greater political and military cohesion among all the West European allies.

The management of international organizations is attracting growing attention. Most of this attention is highly critical of both the UN system and International NGOs. Sometimes, this criticism lacks depth or reflects insufficient understanding of these organizations, or is based on narrow, and sometimes biased, internal political concerns

of a particular country. International relations theory has insufficiently studied the type of linkages that these organizations provide between international decision-making and Northern fundraising on the one hand, and practical action in the South on the other. As a result, current theory too rarely focuses on the inner functioning of these organizations and is unable to explain the deficiencies and negative outcomes of their work. While the authors identify and describe the pathologies of international organizations in, for example, international diplomacy, fundraising, and implementation,

they also stress positive elements, such as their intermediary role. The latter, in particular, could form the basis of more efficient and effective policies, in addition to other recent trends, also described in this volume, that hold hope for a stronger functioning of these organizations in the future. This book presents a long overdue empirical and theoretical overview of criticism on and cures for these organizations. It provides a fundamental rethinking of current approaches to the management of international organizations.
