We present a review of critical concepts and produce recommendations on the management of Philadelphia-negative classical myeloproliferative neoplasms, including monitoring, response de fi-ni-tion, fi-rst- and second-line therapy, and therapy for special issues. Key questions were selected according the criterion of clinical relevance.

Philadelphia-Negative Classical Myeloproliferative ...  
Introduction. Myeloproliferative neoplasms (MPNs) are a rare, heterogeneous group of hematological disorders with shared biology 1, whereby abnormalities in hematopoietic stem cells transform myeloid progenitor cells leading to an overproduction of both mature and immature cells in one or more cell types of the myeloid lineage.The classic MPN entities include polycythemia vera (PV), essential ...
