Psychological Battery for the Elderly (NNB-E) is the first comprehensive and indigenous battery for the elderly in India to evaluate cognitive functions. This battery can be used to study the brain of persons in the age-group of 55 to 80 with various education levels. This can be applied in an illiterate population also.

Introduction. Traumatic Brain Injury (TBI) is the most common cause of death and disability in young people. 1 In India an estimated 1.6 million persons sustain head injury each year with 200,000 deaths and 1 million requiring rehabilitation services at any point of time. The prevalence of patients with TBI in India is
