Nutritional Ecology of the Ruminant - Peter J. Van Soest ...

They supply energy and essential nutrients in the form of protein, vitamins, and minerals. Energy and protein are often the most limiting factors for ruminants and have received the most attention in evaluation systems. Some feed or food characteristics are related to form (e.g., particle size) and have no relation to indigenous chemical composition.

Van Soest, P.J. (1994) Nutritional ecology of the ruminant. 2nd Edition, Cornell University Press, Ithaca, 476. has been cited by the following article: TITLE: Common beans (*Phaseolus vulgaris* L.) in the rations for cattle in feedlot

Van Soest, P.J. (1994) Nutritional ecology of the ruminant ...

Ruminants are, without exception, obligate herbivores subsisting as they do on a diet composed entirely of plant material. However, plant material is a diverse resource and within the Ruminantia there is a range of feeding niches with different herbivore classes focussing their foraging effort on different vegetation types (Hofmann 1989).
