As we are acutely aware, it is essential that malnutrition and dehydration problems are better recognized and treated. Despite a plethora of standards and initiatives aiming to improve nutritional care, there continues to be widespread failure to do so. BAPEN has therefore made a commitment to share examples of best practice.

[Good Practice Case Study - Malnutrition and Nutritional](#)

Abstract. Providing nutrition support may be costly to hospitals under the prospective payment system. A nutrition support team, however, can be effective in controlling costs. To demonstrate the importance of the nutrition support team and to quantify the potential cost savings that can be achieved, a retrospective review of the effect of our team on hospital costs was conducted for the 12-month period of October 1989 to September 1990.

Overview. The APR is a collaborative effort between Cleveland Clinic Center for Human Nutrition and Dietitians in Nutrition Support (DNS), which is a dietetic practice group of the Academy for Nutrition and Dietetics (AND). It is the goal of this program to train proficient-level registered dietitian/nutritionists to become expert clinicians in the management of nutrition support for adults through the application of evidence-based practice.
