Osteoporosis in Focus contains a clear, concise discussion of osteoporosis and reviews the role of the pharmacist in counselling patients on their illness, lifestyle and medicines. Chapter topics include prevention, monitoring the condition, interventions, drug treatment, hormone replacement therapy, bisphosphonates, and screening.

~~Osteoporosis in focus (Book, 2004) [WorldCat.org]~~

Consistent with this, some have advocated expanding the diagnosis of osteoporosis to include those at increased fracture risk based on prior fracture or high fracture probability. 12 Reducing the focus on a T-score diagnosis of osteoporosis is appropriate because many fractures occur in individuals with osteopenic T-scores; indeed, more than 10% of “osteoporosis-related” fractures ...

Osteoporosis is a health condition that weakens bones, making them fragile and more likely to break. It develops slowly over several years and is often only diagnosed when a fall or sudden impact causes a bone to break (fracture). The most common injuries in people with osteoporosis are: broken wrist; broken hip; broken spinal bones (vertebrae)

Osteoporosis is most often caused by aging. However, osteoporosis can be caused by vitamin D deficiency, hyperparathyroidism, hyperthyroidism, corticosteroid medications (steroids such as prednisone and prednisolone), post-menopause low estrogen state, low testosterone blood levels, alcoholism, smoking, thin body frame, immobility, and malabsorption. It can run in families as an inherited trait.
