This highly influential book has been embraced by cutting edge management everywhere. Yet in these days of Enron and what VISA CEO Dee Hock calls our "era of massive institutional failure," Greenleaf's seminal work must reach the mainstream now more than ever.Servant Leadership?—helps leaders find their true power and moral authority to lead.?helps those served become healthier, wiser, freer, and more autonomous.?encourages collaboration, trust, listening, and empowerment.?offers long-lasting change, not a temporary fix.?extends beyond business for leaders of all types of groups.

Within a couple of weeks after the attacks on Pearl Harbor in 1941, selected over 28 other senior admirals, Admiral Nimitz took command of the Pacific Fleet and held that command until the Allied Forces won the war in the Pacific almost four years later. He went on to hold the highest office in the U.S. Navy, the Chief of Naval Operations. Nimitz's ability to lead effectively throughout his career proves that his style of leadership can be a model for any military officer. Even since 1941, the requirement to lead personnel in the Armed Forces has not changed. However, with the advent of information sharing on a global scale, today's military officers are exposed to a wide range of leadership styles such as one presented by Dr. Daniel Goleman derived from the civilian sector. This study examines in detail Goleman's leadership model and compares it to Fleet Admiral Nimitz's style to see if it is feasible for use in the military environment.

The authors of the chapters in this volume—past and present collaborators of Marty Maehr, and a few of his former graduate students along the years—are motivational researchers who conduct research using diverse methods and perspectives, and in different parts of the world. All, however, see their intellectual roots in Marty's theoretical and empirical work. The chapters in this book are divided into two sections: Motivation and Self and Culture and Motivation. Clearly, the distinctions between these two sections are very blurry, as they are in Marty's work. And yet, when the authors were asked to contribute their chapters, the research questions they addressed seemed to have formed two foci, with personal motivation and socio-cultural processes alternating as the core versus the background in the two sections.

Is ethical leadership effective leadership? Are elements of leadership culturally bounded whereas other elements are universal? Does vision really matter? Can leadership be developed? --COVER.
