As might be expected from Peugeot, the 207 had petrol and turbo diesel engine options, with a choice of outputs to suit economy or performance. Two 1.4-litre petrol fours produced 55kW (tuned towards economy) and 65kW (for more zip). There was also a 1.6-litre four with 88kW that powered the hatches and wagons.

From an economist who warned of the global financial crisis, a new warning about the continuing peril to the world economy Raghuram Rajan was one of the few economists who warned of the global financial crisis before it hit. Now, as the world struggles to recover, it's tempting to blame what happened on just a few greedy bankers who took irrational risks and left the rest of us to foot the bill. In Fault Lines, Rajan argues that serious flaws in the economy are also to blame, and warns that a potentially more devastating crisis awaits us if they aren't fixed. Rajan shows how the individual choices that collectively brought about the economic meltdown—made by bankers, government officials, and ordinary homeowners—were rational responses to a flawed global financial order in which the incentives to take on risk are incredibly out of step with the dangers those risks pose. He traces the deepening fault lines in a world overly dependent on the indebted American consumer to power global economic growth and stave off global downturns. He exposes a system where America's growing inequality and thin social safety net create tremendous political pressure to encourage easy credit and keep job creation robust, no matter what the consequences to the economy's long-term health, and where the U.S. financial sector, with its skewed incentives, is the critical but unstable link between an overstimulated America and an underconsuming world. In Fault Lines, Rajan demonstrates how unequal access to education and health care in the United States puts us all in deeper financial peril, even as the economic choices of countries like Germany, Japan, and China place an undue burden on America to get its policies right. He outlines the hard choices we need to make to ensure a more stable world economy and restore lasting prosperity.
Traces the history of the Volkswagen Beetle, from its first introduction as a Nazi propaganda tool and its postwar status as a countercultural icon to its successful revision in 1998.
This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.
Marketing is broken. Everyday, consumers are bombarded with thousands of commercial messages, and they have become increasingly adept at screening out or instantly forgetting them. The advertising quest for eyeballs is floundering and research and developments in technology suggest that reaching people will only get increasingly difficult with time. Meanwhile, exciting breakthroughs in neuroscience and psychology have given us greater insights into human emotions than ever before. And important findings suggest that marketing communication - and consumers - can benefit from this. Companies that change their promotional efforts to focus on emotional engagement with their would-be customers can convey values and benefits more accurately, be more persuasive, gain better memorisation, have their marketing go viral with greater speed, and ensure they get the best possible returns from product placement and celebrity endorsement. A share of heart, not a split-second of attention, must now be the goal of all marketers. Emoti-coms is the revolutionary guide to this new approach. Lucidly covering the theoretical groundwork and introducing actionable ideas, hints and tips for your own emotion-based campaigns, it also addresses the ethical dimension of thisa new and powerful way of getting your message out to the world. A fascinating and provocative read for all marketing and communications professionals.
“Crichton fuses with 'True Detective' in a hammering hard-science thriller where the heart of darkness lies not in the soul, but in the genes. Thilliez engineers a winner.” —Scott Sigler, New York Times-bestselling author of the Infected trilogy New from Mark Polizzotti, translator of 2014 Nobel Prize-winning author Patrick Modiano: the gripping sequel to runaway international bestseller Syndrome E In the shocking sequel to runaway international bestseller Syndrome E, Lucie Henebelle and Inspector Sharko have reunited to take on the case of the brutal murder of Eva Louts, a promising graduate student who was killed while working at a primate research center outside Paris. But what first appears to be a vicious animal attack soon proves to be something more sinister. What was Eva secretly researching? Was she tracking three fanatical scientists who control a thirty-thousand-year-old virus with plans to unleash it into the world? With his unmatched ability to inject cutting-edge science into his novels, Thilliez draws on genetics, paleontology, and the dark side of human nature to create this smart, adrenaline-fueled thriller. Bred to Kill moves from the rain-slicked streets of Paris to the heart of the Alps to the remote Amazon jungle as Lucie and Sharko work to solve the murder—before whoever killed Eva comes for them.
